THE FOUNDATION STONES OF A SUSTAINABLE BEEF INDUSTRY

'North Toolburra' 1123 Warwick-Allora Rd Warwick, Queensland (also at 'Khancoban', Glen Innes NSW)

SALE INFORMATION

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 1pm on Friday 23rd September, 2016.

Bulls may be inspected from 10.00am on the marriag of the sale, or at any

on the morning of the sale, or at any other time by arrangement with the agents or vendor.

SELLING SYSTEM:

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

REBATE:

4% Rebate to outside agents registering Bull buyers, in writing, PRIOR to the sale, and settling on their behalf within 14 days of the date of invoice.

PHONE BIDDING:

We have full mobile phone coverage at the sale. If you intend purchasing over the phone, please contact the selling agents to reserve a line.

GST-

All animals are sold exclusive of GST.

INSURANCE:

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for their first six months of working life. There are a number of options available through Elders Insurance at the sale venue.

AUCTION PLUS

This year we will have live video and audio streaming all done through Auctions Plus. Please register 24hrs before the sale.

REGISTRATION:

Ownership transfer of bulls will be registered by the vendors with Angus Australia or Charolais Australia provided accurate transferee details are supplied with the Buyers Instruction form.

CATERING:

Please join us for complimentary morning tea, lunch and after sale drinks.

PHYSICAL EXAMINATION OF BULLS

All bulls offered for sale will be vet checked near sale date and only sold if deemed satisfactory for the following inspections:

- Palpation of internal genitalia
- Palpation of Scrotal Contents
- Semen Testing
- Physical examination of feet, legs, gait, head and joints.

TEMPERAMENT

The bulls have been handled with horses, ATV utilities and on foot. We know their temperament individually and are confident that under normal circumstances each animal in the sale is of sound temperament. Understandably each year on sale day an occasional bull misbehaves due to the big change to the yard area and the pressures of strange people invading their space.

HEALTH QA:

The bulls are ready for immediate use. We have treated them as follows:

- Double vaccinated them with Vibrovax
- Vaccinated for Tick Fever
- Double Vaccinated them with 7 in 1
- Double Vaccinated for 3 Day
- Drench with Cydectin Pour On prior to sale
- Botulism

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

WARRANTY

THE VENDOR WARRANTS THAT:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and

THE VENDOR WILL EITHER:

- 1. Provide a satisfactory replacement or
- Provide a credit for use at the next Ascot Cattle Co Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

WHERE

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

THE PURCHASER ACKNOWLEDGES THAT:

The purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The Seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risk associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert of bulls fighting and if one is playful with you, do not respond by patting his head.

What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

DELIVERY

Agents Elders, Landmark and Colin Say & Co will be handling the organisation of delivery of Sale Cattle. Free freight is offered to major centres Queensland and NSW

Responsibility goes to purchaser at fall of hammer. We recommend insuring all bulls.

SEMEN RIGHTS

All bulls sell with 80% semen marketing rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands.

However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties.

Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale.

Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from a bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcases meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

1. MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting; is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level.

Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcases and a higher incidence of dark cutting.

Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament, and when available, selecting animals with superior Docility EBVs. Docility EBVs are estimates of genetic differences in the percentage of an animal's progeny that will be scored with acceptable temperament, with higher EBVs associated with superior temperament. For example, an animal with an EBY of +20% would be expected to on average produce a greater percentage of progeny that have acceptable temperament than a bull with an EBY of -2%.

Research has also demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency.

Selection for increased muscle content in a standard weight carcase can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcase, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +4.4 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of + 1.0 mm, relative to carcase weight.

2. RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs.

A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance.

In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcases to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal.

Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcase, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +0.4 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.6 mm, relative to carcase weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcase and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal.

Selection of animals with acceptable temperament, higher Docility EBVs, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcase fatness and higher Carcase Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd.

To further discuss breeding for MSA programs, please contact staff at SBTS and TBTS. More information about Meat Standards Australia is also available from the MLA website

(www.mla.com.au).

WORKING AGE YEARLINGS BECOMING POPULAR

In Australia and other parts of the world, there is a trend towards using bulls at yearling age (12-18 months). This allows introduction of superior genetic material into herds a year earlier than normal, resulting in faster genetic improvement.

Their introduction has the potential to allow breeders to extend the working lives of bulls by a year or more, lowering the bulls costs of a herd. This extra workload is achieved at the time in their lives when they are young, lean, fit and exuberant. They are free of the structural problems that beset older bulls.

Yearling bulls have much to offer, both genetically and financially. However, poor management can reduce calving percentages, compromise animal welfare and limit their lifetime potential. In order to harness the immense potential of yearling bulls, special management is required-their age and physiological status demands it.

SUMMARY

In order to harness the potential of yearling bulls there are three crucial management requirements:

- 1. Join them either alone or with bulls of the same age.
- Join yearling bulls for 6-8 weeks (2 cycles) only, then spell them for at least 3 months.
- 3. After removing yearling bulls from their joining groups, place them on high quality feed in specially prepared paddocks.

Experience has shown that many young bulls have been ruined because they have been joined for too long and under conditions that have challenged their survival. If, at any stage, yearling bulls drop below 2 score condition, they should be withdrawn from their joining group immediately.

HOMOZYGOUS POLLED EXPLAINED

THE ASCOT CHAROLAIS POLLED FOCUS

Ascot is devoted to breeding Charolais cattle that are polled but still retain the correct phenotype, carcass qualities and fertility. Polled cattle have sometimes been criticized for losing bone, phenotype and carcass quality and perhaps rightfully so as in the past some breeders may have just bred the polled gene and disregarded the other important traits.

At Ascot we are endeavouring to have the best of both worlds. Great polled cattle.

Over the last couple of years we have made some real headway in this and through testing many of our cattle for the HOMOZYGOUS polled gene at the University of Qld we have found some lines or combinations that produce this gene more readily.

For those of you who are not familiar with the term Homozygous polled it means in summary animals that test with a very high percentage of this gene (say 90% and above) have a very high probability of throwing nearly all calves that are polled or perhaps scurred. This is even if the other parent is horned. The gene once the animal has it is that strong that it can over ride the other parent.

THE ADVANTAGES OF HAVING POLLED ARE FAIRLY OBVIOUS BUT INCLUDE:

- Time and stress saving (for both animal and owner) not having to dehorn
- Reduces bruising and improves profitability
- Appeases the animal liberation movement
- Attractive cattle at sale time improving demand.

THE ASC TANTAGE

e are a customer focused Angus and Charolais breeding operation which aims to deliver low risk, thick, polled bulls, bred with an MSA targeted approach.

Our breeding headquarters are located at North Toolburra Station, Warwick, Queensland. We also have a breeding operation at Glen Innes in Northern NSW. We have around 550 stud breeding females consisting of roughly 300 Angus and 250 Charolais.

We feel strongly that the industry will benefit from bulls that have had been bred under our strict standards.

These strict standards are designed to produce bulls that will improve the long term efficiency and profitability of the beef industry.

When you buy an Ascot Angus or Charolais bull you can be assured that the very best of both modern and traditional methods have been used. The result is progeny that will calve easily, grow, finish quickly and grade highly.

Cattle are our passion and we look forward to hearing how we can work with you. Inspections are welcome at any time by appointment or visit our web site for news and updates.

PHENOTYPE

Whilst we use the very latest of breeding technologies, phenotype is a major part of our breeding program.

Our bulls will be quiet, polled, have great skin type and exhibit, weight, softness and easy doing ability.

CARCASE FOCUSED

We use ultra sound scanning for EMA, IMF% and fat cover. Combined with weight for age data, this gives us strong information on what our cattle can do. This data is submitted to Breedplan and is also available to clients whilst assessing.

GROWTH FOCUS

Weight is money. With that said we are focused on cattle that can grow quickly to MSA standards. The added benefit of this is moderate mature cow weight thus maintaining productive and efficient replacement females.

DOCILITY FOCUS

Ever since we started we have been culling extremely hard for bad docility in our herds plus selecting sires that are very docile as our number one trait .We have now been doing this for many years and we always get compliments on our cattle's temperament.

CALVING EASE

We weigh nearly every calf born. This ensures that the data supplied is 100% accurate. So whether you buy a terminal or a self replacing sire from us you will have an accurate estimation to the weight of your calves. We also record for days to calving, calving ease, scrotal and gestation length.

BETTER BREEDING DECISIONS

The perfect complement to your herd, Ascot bulls will add kilos, carcase and finishing ability.

The option of 2 breeds provides you with more options and genetic diversity for your herd.

POLLED FOCUS

Angus are naturally polled. We run a homozygous polled breeding and testing program for our Charolais herd and cattle with this gene have approximately 98% chance of throwing all polled progeny. We aim to eventually have a Homozygous polled Charolais herd as well as preserving the Charolais traits of muscle and weight gain ability. Approximately 90% of our bulls sold each year are polled.

MARKET FOCUS

MSA grading is the basis to our selection criteria. Our bulls will add carcass value and eating quality to your progeny. We select for positive fat cattle, (for both fertility and finishing) and for cattle that can exhibit marbling.

INDEPENDENTLY ASSESSED

All bulls are semen tested and vetted for soundness.

HEALTH

Every bull sold has been vaccinated for Pesti Virus, 7 in 1, 3 Day, Tick Fever, Botulism and Vibrio.

DATA RECORDED

We submit data to Breedplan for the following traits. CE, CE Dtrs, GL, Bth Wt, 200D, 400D, 600D, Mat. Cow Wt, Milk, Scrotal, Days to calving, Carcase Wt, EMA, Rib Fat, Rump Fat, Retail Beef Yield, IMF%, Long Fed, Heavy Grass Fed, Short Fed and Terminal Indexes.

COMMENTS

Angus Australia Benchmarking Program Cohort 5 - just realeased: Hallmark is rated No.3 in top 10 for 200D Wt and Angus Breeding Index

Outstanding sire for the future by Te Mania Emperor out of a Millah Murrah D108 daughter.

Great temperament, good bone and great muscling complement his sire's outlook. Good footed. Tight sheath. Huge scrotal. Frame score 7.

- Calving: Positive calving ease. Top 5% days to calving
- Growth: Top 1% 200,400 & 600 day growth Top 5% Carcass weight
- Carcass: Top 15% IMF
- Fertility: Top 1% Scrotal size
- Indexes: Top 1% all indexes

Top 1% Breed for 200D,400D,600D & Carcase Wts Top 5% Milk & All Indexes Top 10% Eye Muscle Area . Now this is one serious bull !! He is so long he literally fills the crush & at only 24 months. He has truly lived up to his EBVs of top 1% for 200, 400 & 600 day weights. He is over 1000 KGS but is not overly tall. It is all length, thickness & depth. He has tremendous strength of spine for such a long bull. He has been a standout from a calf. Huge scrotal at 44 cms & progressive motility of 90% at semen testing. By the Texas Global bull who is breeding extremely well for us & the Texas stud. Out of a very long Kansas female. We have already collected semen for in herd use & as with all our sale bulls we retain 20 % semen marketing rights. STUD SIRE potential.

Top 10% Breed for Calving Ease, Shorter Gestation Length & Rump Fat, Top15% Lower Birth Wt & Milk Top 25% Heavy Grass Index, Rib Fat 400D Wt & Calving Ease Dtrs. Huge weight for age in this bull which comes from his added length. Typical Millah Murrah Highlander son that is soft, thick & deep that would suit the grass fed market. Positive fat bull with positive calving ease & lower birth weight EBVs means he should suit heifers or cows. A very versatile bull that we think a lot of. Has stud potential.

One of the best bulls in the sale in my mind. An Ascot Hallmark son with added length & huge weight for age that stacks up with his top 1% growth EBVs.He also has positive fats & high marbling indexes. Woud suit grass fed or grain fed markets. Great skin & coat type like his sire.Dam is one of our favourite Kansas females we bought from their dispersal.A real industry focused bull that would make a high end commercial bull or STUD SIRE prospect.One of my personal favourites in the sale.

This is a very interesting moderate framed bull. One of our favourites he is out of Ascot Hallmarks mother Millah Murrah Brenda F123 who has sold sons to \$18,000.00. She has one of the best calves every year without fail. She has not disappointed here. Super thick, super soft he weighs as much as most of the larger framed bulls. Tremendous balance of EBVs from positive calving ease, lower birth weight, large scrotal, high eye muscle & very high positive fat EBVs. Top end commercial bull. Have a good look at this slick coated, tight sheathed bull.

Top 10% Breed for Calving Ease, Scrotal Size, Shorter Gestation Length, Angus Breeding, Domestic & heavy Grass Indexes Top 20% 600D Wt,Milk,Rib & Rump Fats. The last Carabah Docklands son in sale. He is a moderate framed bull but with extra depth & thickness. From one of our top Millah Murrah females he has balanced EBVs including calving ease & lower birth weight EBVs meaning he should suit cows & heifers. Would suit the grass fed market well. Smooth skin & hair type.

Top 1% Breed for Scrotal Size Top 5% 400D & 600D Wts Milk Top 10% 200D Wt,Retail Yield & Heavy Grass Index Top 15% Carcase Wt,Angus Breeding & Heavy Grain Index. The last of the 2 year old angus bulls in the sale & we have saved one of the very best for last. Out of one of my favourite donor cows who is very long & deep by the Texas Global sire who also has great length & capacity. One of the heaviest bulls in the sale he will mature into a serious bull. He lives up to his great EBVs for growth in the top 5 % for the breed & with huge scrotal. All this but still has positive calving ease & moderate birth weight EBVs. Extremely docile bull with slick coat and great sires outlook. We really like him.

Our property has long standing history with the Scotts College in Warwick. North Toolburra was home & school to the students of Scotts for 2 years during the 2nd world war years so we are selling this bull on their behalf to continue our relationship. Scotts will offer the same guarantee as Ascot does for this bull & has been semen tested & vet checked. He comes with our recommendation. This outstanding bull is a genuine all-rounder whose offspring will suit a range of markets. He has 10 EBV s in the top 10%, with 200 day, 400 day and Carcase weight in the top 5%. Phenotypically, a very appealing bull with plenty of thickness, depth of body and structural soundness which has helped him achieve first place in a number of shows this year including his class EKKA 2016.

Rib Fat & Shorter Gestation Length Top 25% Carcase Wt. HOMOZYGOUS POLLED. Look at the meat & hind guarter on this moderate framed bull. Over 1000 kgs this early maturing bull has a sires outlook, very slick coat and carcass trait EBVs that are nearly perfect. Positive calving ease & lower birth weight EBVs mean he should suit heifers as well as cows. This is a very unusual sire as he would be one of the easiest doing bulls we have seen in the paddock. Being Homozygous polled you would struggle to find a bull like this anywhere that combines low birth weight & extreme early growth, muscle & doing ability. He gets fat very quickly as you can see. In his working clothes he looks even more of a sire. Can you imagine the weaners or vealers this bull wold produce. Semen share retained by Ascot.

A larger framed, easy moving bull here that lives up to his top 1% for growth EBVs. Over 1000kgs & full of meat. He is a real carcass trait leading bull with high positive fat , high eye muscle and with marbling EBVs also in the top 1%. He has a great pedigree being out of the dam of Juggernaut, our grand champion bull & top priced bull in last years sale at \$30,000.00. His sire is Ascot Goldrush who is breeding many top sires. Smooth coated & good temperament. A good industry sire. A real colossus. Don't miss him.

Top 1% Breed for All Indexes & Shorter Gestation Length Top 5% Calving Ease,Lower Birth Wt,400D & Carcase Wts,Scrotal Size & IMF Top 10% 200D & 600D Wts,Milk & Eye Muscle Area Top 15% Rump Fat. HOMOZYGOUS POLLED. This bull we like a lot. Beautiful sires head, very quiet, slick skinned, soft, with good muscle, moderate framed with ideal bone & carcass trait EBVs mostly in the top 1 to 5% . He has good weight for age at approx 1000kgs. Another tremendous industry focused bull that is HOMO POLLED. These bulls are hard to find that have all the carcass attributes, plus homo polled, plus high weight for age. Should suit heifers or cows. Very good bull.

HOW TO GET THERE

STANDARD STUD STOCK - AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE: All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

- 1. The highest bidder shall, subject to Conditions 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
- 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
- The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
- 4. The auctioneer expressly reserves the right, without giving any reason therefore to:-
 - (a) Refuse to acknowledge any bid;
 - (b) Withdraw any lot or lots before or during the sale;
 - (c) Exclude any person from the auction venue should it think fit.
- 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
- 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
- 7. In the event of any dispute in respect to the sale of any lot:-
 - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
 - (ii) The vendor and the purchaser shall resolve the dispute between themselves:
 - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
 - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing. The name of the vendor for whom the auctioneer acts is acknowledged to
- 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
- 9. (a) PAYMENT Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidders' offer by the vendor and prior to delivery. Notwithstanding that delivery is given to ar possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:'
 - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
 - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill RAte and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Banker's Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser for the interest rate to apply for the purpose of this condition.
- 9. (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
- 10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
- 11. Any vendor or purchaser removing the Sale Number from any lot after it

- has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
- The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
- 13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of quarantee.
- 14. The auctioneer may, should it think fit, make arrangements on a puchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
- 15.No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
- 16.(a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby executed. The auctioneer is not liable in respect of any error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
- 16.(b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to remain with the vendor.
- 17. In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.
- 18 (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
- 18 (b) If any vendor brings to the premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
- 19.DELIVERY. Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
- 20. In these Conditions:-
 - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
 - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
 - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
- (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.

 IMPORTANT NOTICE The Vendor and the Selling Agent, its members,

IMPORTANT NOTICE The Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.

All persons who attend the sale do so entirely at their risk and the Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
