Watch 2017 bull pre-sale video at ascotcattle.com.au

Welcome to our Spring bull sale 2017.
Thank you to all past supporters of our sales.
We can't tell you how much of a thrill we get
out of all the great people we meet and that
support our sales.

Our inaugural Autumn Bull & Female sale in March this year was successful and the good feedback about the bulls and females being great value for money from the new buyers has been very pleasing.

Following on from our Queensland record Angus bull sale last September, the Autumn sale came back to a more sustainable average, which we were more than happy with.

Leading Stud Stock agent Blake Munro of Elders commented on our record sale last year: "The new Qld. record average and top price for Angus bulls achieved by Ascot last year was no accident but a true reflection of the quality of the Ascot bulls and Jim & Jackie's dedicated breeding program aimed at the commercial sector. This year's sale bulls are of equal or higher quality".

Our breeding program continues with similar focus in both breeds where we are trying to breed cattle that suit the emerging market place. In general we are breeding for polledness, docility, calving ease, early growth, finishing ability, fertility and eating quality.

MSA is still our overarching target. Our breeding decisions are based on our clients' needs and profit drivers so progeny can be turned off quicker and with better weight for age. By continuing in this vain and using all the technologies available in our breeding and sire selection programs we genuinely hope to produce more efficient beef animals that will make us all more efficient, profitable and sustainable.

Our sale bulls are similar to last September's sale and exhibit superior muscle, bone and softness.

With the continuing good prices being paid for all classes of cattle higher quality bulls will certainly pay for themselves now more than ever and should be regarded as sound investments. As well as selecting the most suitable bulls from Australia and overseas for our Al and natural programs that suit our market focus we are also continuing our ET programs to increase the number of quality females in our herd that suit our target markets.

### **ANGUS SALE BULLS**

We are proud to present 65 mid maturity Angus bulls for this year with approximately 75% being 2 year olds and the balance working age yearlings. Many of the bulls are sired by proven Australian sires with the attributes we look for and include Ascot Hallmark, Millah Murrah Highlander G7, Millah Murrah Time on, Millah Murrah Hercules, Te Mania Emperor, Texas Global, Carabar Docklands, Irelands Gapsted and Te Mania Berkley. In addition to this we have some new sire lines represented that add some extra meat and muscle. These include sons by the \$400,000 U.S. bull SAV International; (these are possibly the first sons to be auctioned in Australia) and are extremely thick and impressive. Also some yearlings by the current Australian top priced \$150,000 bull Millah Murrah Kingdom will be offered, these being be some of the first to be sold in Australia. All bulls in the sale are either by Al sires or natural sires who are AI sires in their own rights. Many of the sale bulls should suit heifer joinings.

### **CHAROLAIS SALE BULLS**

We will have 50 mainly mid maturity, medium framed Charolais bulls in this sale and all will be polled or polled/scurred. Majority of these will be rising 2 year olds with aprox 10 red factor. Approx 20 of these bulls will be DNA tested to be homozygous polled. This means nearly all progeny will be polled regardless if cows are horned. These homozygous bulls are becoming very popular as many producers are trying to introduce polledness to their herds.

We have a very extensive poll testing program in our herd where we are trying to introduce more polled lines without losing all the other important carcass traits that Charolais are renowned for. Comments from recent sale bull inspections are that they are surprised at the power, thickness and softness of our polled bulls.

Our Charolais breeding program also continues to concentrate on breeding bulls that have good early growth, positive fat and reasonable IMF to increase the eating qualities of the Charolais. From feedback from feedlotters and producers, these are the traits that will make Charolais more useable. A number of the Charolais sale bulls should also suit heifer joinings.

All bulls have had the following treatments: 3 germ blood for tick fever, 3 day sickness BEF vax,7 in I, Pestiguard and Vibrio. All bulls are semen tested and vet checked with bull breeding soundness certificate provided. All bulls are registered and all fully breedplan recorded. All bulls are guaranteed.

Free delivery will again be offered to most major centres in Queensland and NSW. Auctions plus will operate with live video streaming.

Please contact us or your agent if you would like a presale inspection.

IF YOU WOULD LIKE A HARD COPY
OF OUR CATALOGUE POSTED TO YOU
PLEASE CONTACT US. THE CATALOGUE
AND SUPPLEMENTARY SHEET
WILL ALSO BE ONLINE AT
WWW.ASCOTCATTLE.COM.AU

Thanks again to all that have supported our previous sales and we look forward to again meeting you at our upcoming sale.

Complimentary morning tea, lunch and after sale refreshments will be provided.

**Yours sincerely,** Jim and Jackie Wedge.

### **SALE INFORMATION**

### **SELLING SYSTEM:**

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

### REBATE:

4% Rebate to outside agents registering Bull buyers, in writing, PRIOR to the sale, and settling on their behalf within 14 days of the date of invoice.

### PHONE BIDDING:

We have full mobile phone coverage at the sale. If you intend purchasing over the phone, please contact the selling agents to reserve a line.

### GST:

All animals are sold exclusive of GST.

### **INSURANCE:**

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for their first six months of working life. There are a number of options available through Elders Insurance at the sale venue.

While all care and attention will be taken liability of bulls falls to the purchaser at fall of hammer.

### **AUCTION PLUS**

This year we will have live video and audio streaming all done through Auctions Plus. Please register 24hrs before the sale.

### **REGISTRATION:**

Ownership transfer of bulls will be registered by the vendors with Angus Australia or Charolais Australia provided accurate transferee details are supplied with the Buyers Instruction form.

### **CATERING:**

Please join us for complimentary morning tea, lunch and after sale drinks.

### PHYSICAL EXAMINATION OF BULLS

All bulls offered for sale will be vet checked and a Veterinary bull breeding soundness evaluation certificate issued before sale date sale date and only sold if deemed satisfactory for the following inspections:

- Palpation of internal genitalia
- Palpation of Scrotal Contents
- Semen Testing

 Physical examination of feet, legs, gait, head and joints.

### **TEMPERAMENT**

The bulls have been handled with horses, ATV utilities and on foot. We know their temperament individually and are confident that under normal circumstances each animal in the sale is of sound temperament. Understandably each year on sale day an occasional bull misbehaves due to the big change to the yard area and the pressures of strange people invading their space.

### **HEALTH QA:**

The bulls are ready for immediate use. We have treated them as follows:

- Double vaccinated them with Vibrovax
- Vaccinated for Tick Fever
- Double Vaccinated them with 7 in 1
- Double Vaccinated for 3 Day
- Drench with Cydectin Pour On prior to sale
- Botulism
- Ascot has J Bas 7 Johnes status

### **BULL HANDLING**

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

### FEEDING REGIME & MANAGEMENT.

The life cycle of our bulls consists of running on crop or pasture all of their lives until just prior to sale time when they receive a high hay base ration. This ration contains a nutritionist formulated supplement with added vitamins, minerals and antioxidants for foot, fertility and general health. The high roughage ration also includes chopped hay, straw and rolled barley at very low percentages. This ration also helps adjust the rumen to help them cope with whatever pasture conditions they encounter at their new homes.

### DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure the accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occured.

### WARRANTY

### THE VENDOR WARRANTS THAT:

 Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period");

### THE VENDOR WILL EITHER:

- 1. Provide a satisfactory replacement or
- 2. Provide a credit for use at the next Ascot Cattle Co Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

### WHFRF

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

### THE PURCHASER ACKNOWLEDGES THAT:

The purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The Seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

### HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risk associated with cattle handling.

### VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert of bulls fighting and if one is playful with you, do not respond by patting his head.

What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

### **DELIVERY**

Agents Elders, Landmark and Colin Say & Co will be handling the organisation of delivery of Sale Cattle. Free freight is offered to major centres Queensland and NSW

Responsibility goes to purchaser at fall of hammer. We recommend insuring all bulls.

### **SEMEN RIGHTS**

All bulls sell with 80% semen marketing rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands.

However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties.

Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale.

Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from a bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

While every care and attention to details in catalogue has been made we cannot guarnatee that some mistakes have occurred during printing or construction of catalogue.

### **POLL TESTING**

Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ\_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100 % correct. We rely on the university to determine an animals status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test deemed to be incorrect.

### SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcases meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

### 1. MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting; is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level.

Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcases and a higher incidence of dark cutting.

Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament, and when available, selecting animals with superior Docility EBVs. Docility EBVs are estimates of genetic differences in the percentage of an animal's progeny that will be scored with acceptable temperament, with higher EBVs associated with superior temperament. For example, an animal with an EBY of +20% would be expected to on average produce a greater percentage of progeny that have acceptable temperament than a bull with an EBY of -2%.

Research has also demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency.

Selection for increased muscle content in a standard weight carcase can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcase, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +4.4 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of + 1.0 mm, relative to carcase weight.

### 2. RIB FAT THICKNESS & FAT DISTRIBUTION

site between the 5th and 13th ribs. A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance. In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcases to have adequate fat coverage over all major primals, with an

area of inadequate fat distribution not be-

ing greater than 10cm x 10cm over each

Rib fat thickness is the measured depth

of subcutaneous fat over the guartered rib

Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcase, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +0.4 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.6 mm, relative to carcase weight.

### TAKE HOME MESSAGES

individual primal.

Whilst many of the factors that affect the eating quality of a carcase and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal.

Selection of animals with acceptable temperament, higher Docility EBVs, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcase fatness and higher Carcase Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd.

To further discuss breeding for MSA programs, please contact staff at SBTS and TBTS. More information about Meat Standards Australia is also available from the MLA website

(www.mla.com.au).

### **WORKING AGE YEARLINGS BECOMING POPULAR**

In Australia and other parts of the world, there is a trend towards using bulls at yearling age (12-18 months). This allows introduction of superior genetic material into herds a year earlier than normal, resulting in faster genetic improvement.

Their introduction has the potential to allow breeders to extend the working lives of bulls by a year or more, lowering the bulls costs of a herd. This extra workload is achieved at the time in their lives when they are young, lean, fit and exuberant. They are free of the structural problems that beset older bulls.

Yearling bulls have much to offer, both genetically and financially. However, poor management can reduce calving percentages, compromise animal welfare and limit their lifetime potential. In order to harness the immense potential of yearling bulls, special management is required-their age and physiological status demands it.

### **SUMMARY**

In order to harness the potential of yearling bulls there are three crucial management requirements:

- 1. Join them either alone or with bulls of the same age.
- Join yearling bulls for 6-8 weeks (2 cycles) only, then spell them for at least 3 months.
- 3. After removing yearling bulls from their joining groups, place them on high quality feed in specially prepared paddocks.

Experience has shown that many young bulls have been ruined because they have been joined for too long and under conditions that have challenged their survival. If, at any stage, yearling bulls drop below 2 score condition, they should be withdrawn from their joining group immediately.

### **HOMOZYGOUS POLLED**

All animals stated as Homozygous polled in this catalogue have been tested with the SEQ\_POLL Prediction test at AGL, University of QLD prior to sale, and are PcPc or PcPf Homozygous.

### **HOMOZYGOUS POLLED EXPLAINED**

Recently, candidate mutations associated with polled phenotype in European breeds of cattle were found. There are two independent origins of polled, one found in Holstein-Friesian and Jersey breeds (Pf), the other in many European breeds of Celtic origin (Pc) such as Angus, Blonde d'Aquitaine, Dexter, Limousin. Charolais and Hereford, among others. Polledness is dominant; a polled animal can have one or two copies of the gene. All offspring of a bull with two copies of polled (homozygous) will be polled. Genetic testing is a cost effective means to determine if a polled animal has 1 or 2 copies of the gene.

**Pc/Pc Polled.** Two copies of the Polled-Celtic molecular marker are present. All offspring will be polled.

**Pc/Pf Polled.** One copy of the Polled-Celtic and one copy of the Polled-Friesian molecular markers are present. All offspring will be polled.

Medugorac I, D Seichter, A Graf et al. Bovine Polledness – An autosomal dominant trait with allelic heterogeneity. PLoS One 7(6): e39477 ,2012. (as supplied by AGL,UQ,Gatton.Q.)

Poll testing: Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ\_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100 % accurate. We rely on The University to determine an animals status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test deemed to be incorrect.

## THE ASCOT ADVANTAGE

e are a customer focused Angus and Charolais breeding operation which aims to deliver low risk, thick, polled bulls, bred with an MSA targeted approach.

Our breeding headquarters are located at North Toolburra Station, Warwick, Queensland. We also have a breeding operation at Glen Innes in Northern NSW. We have around 550 stud breeding females consisting of roughly 300 Angus and 250 Charolais.

We feel strongly that the industry will benefit from bulls that have had been bred under our strict standards.

These strict standards are designed to produce bulls that will improve the long term efficiency and profitability of the beef industry.

When you buy an Ascot Angus or Charolais bull you can be assured that the very best of both modern and traditional methods have been used. The result is progeny that will calve easily, grow, finish quickly and grade highly.

Cattle are our passion and we look forward to hearing how we can work with you. Inspections are welcome at any time by appointment or visit our web site for news and updates.

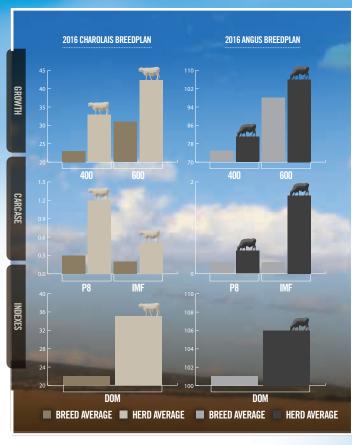

### **CARCASE FOCUSED GROWTH FOCUS DOCILITY FOCUS CALVING EASE PHENOTYPE** Weight is money. With that Whilst we use the Ever since we started We weigh nearly every very latest of breeding calf born. ### COMMENTS

Angus Sire Benchmarking Program Cohort 5 – Hallmark is rated No.5 for 200D wt, No.7 for 400D wt, No.2 for 600D wt, No.5 for Rib Fat and No.2 for Rump fat.

Outstanding sire for the future by Te Mania Emperor out of a Millah Murrah D108 daughter.

Great temperament, good bone and great muscling complement his sire's outlook. Good footed. Tight sheath. Huge scrotal. Frame score 7.

Top 20% Retail yield & Shorter Gestation Length. This bull was a calf at foot when we purchased his dam at the Banquet Mature age dispersal. We bought her as we thought she was a great cow & had the best calf. She also has a 100% calving record. This calf certainly hasn t disappointed, a very docile bull with extra bone, length, tight sheath, large scrotal & great weight for age. He has real sire appeal and has STUD or top end commercial potential.

Top 5% for 200D,400D & 600D Wts,Shorter Gestation Length,Angus breeding & Heavy grass indexes.Top 10% Eye muscle area,Domestic & Heavy grain indexes.Top 15% Carcase wt & Shorter days to calving.Top 25% Milk.Top 30% Calving ease. One of our favourite bulls in the sale this bull once again exhibits extra length & top end weight for age. He is a bull that has been at the top of the tree ever since a calf (one of the heaviest weaner weights) & still is up there with the best. A more balanced set of EBVs would be hard to find as a bonus. He has a strong sires head, tight sheath, slick skin, large scrotal & has STUD or top end commercial potential in our view. By the top Al sire Emperor & by one of our favourite Millah Murrah cows.His dam has a 100% calving record. Dont overlook him.

Top 10% 200D wt.Top 15% Carcase wt. Top 25% 400D wt & Rib fat. This is the first of the calves by the \$400,000 US American sire SAV International 2020. FIRST OF THE 18 MONTH OLD BULLS. NEXT 4 BULLS ARE THIS AGE BRACKET.He is possibly the first bull by International to be auctioned in Australia as we were one of the first to bring semen in from him ( No more semen is commercially available in Australia now). We are impressed with the line of bulls we have in the sale by International. They all exhibit extra muscle, bone & thickness. This fellow is possibly my favourite but it's hard to choose from a number of them. He was the best from a calf. He is out of a top Millah Murrah donor cow in our herd. A positive fat bull he exhibits extra capacity, softness, fleshing & has a tight sheath & is clean coated. He could SUIT STUD duties or top end commercial use. We really like him & has real presence and doing ability.

Top 1% 200d Wt.Top 2% 400D,600D & Carcase Wts.Top 10% Milk & Rib fat.Top 15% Scrotal size.Top 20% Rump fat & Heavy grain index. Another of the \$400,000 International sons & possibly the most complete. He is very tight sheathed, long & smooth but still thick as a brick like all of his brothers. With top end growth EBVs & positive fats he has top carcass traits to match his sires outlook. His dam is a beautiful cow & has a 100% calving record.Another bull we think has STUD or top end commercial CREDENTIALS. With no more semen available in his sire it would be prudent to get hold of a son.Possibly one of the best bulls in the sale.

Top 2% Shorter gestation length. Top 5% IMF, Rib & Rump fats, Shorter days to calving Top 10% Calving ease dtrs, Heavy grain,grass & Angus breeding indexes. Top 15% Calving ease. Top 25% 200D,400D & 600D Wts.Low birth wt. This is the first of the yearling bulls in the sale by our sire Ascot Hallmark who sired our top priced bull in last years sale at \$70,000 & had 6 six sons who averaged \$19,000. The Australian record holding Millah Murrah stud also sold 10 Hallmark sons at their last years sale to average \$20,000. This is definitely one of the pick bulls in the sale & my personal favourite. He exhibits many features of his sire with his added length, tremendous depth of flank & thickness right through plus he is extremely docile like his sire. He has balanced EBVs across the board including high positive fats & high IMF making him very easy to use in a stud situation. He also has the added benefit of high calving ease & lower birth weight EBVs which SHOULD MAKE HIM SUITABLE FOR HEIFERS or cows. He is possibly the most versatile bull in the sale & should suit STUD DUTIES or top end commercial use.All this and a heifers first calf.

Top 5% 200 day weight,top 10% 400,600 day & carcass weights & milk,Top20% rib & rump fats. Most people that inspect the bulls are attracted by this bull. As said before there are number of these International calves that are hard to choose from.This bull has extra bone & length, very tight sheathed,large scrotal size & extremely docile. He has top end growth EBVs in the top 10% for the breed with positive fats. He has a strong sires head and good confirmation. A bull that could suit STUD DUTIES or top end commercial use.His dam is another beautiful cow with a 100% calving record. Many have singled this bull out on inspection.Dont miss this bull!!

Top 1% Scrotal size.Top 10% Milk & Shorter gestation length. Top 20% Rump fat & Shorter days to calving.Top 25% 600D wt & most Indexes.This is an attractive thick, deep bull, with clean coat,tight sheath,good scrotal size with a great sires outlook. He stands out on inspection. His sire was the top priced angus bull in Australia in 2014 at \$70,000: Millah Murrah Hercules which is a colossus of a bull.I think this bull will mature into a powerful sire as well. He is a heifers first calf with nicely balanced EBVs. Nice bull.

Top 1% 200D wt, Top 5% 400D & Carcase wts. Top 10% 600D wt, Rib & Rump fat, Shorter gestation length & Heavy grass index. Top 15% Domestic index & Shorter days to calving. We are selling this bull unregistered for the only reason he has a very small piece of white hair in front of his navel (Angus regulations dictate bulls with any white in front of navel can't be registered). For the commercial user this may not be an issue & you have the opportunity to buy a son of the \$400,000 International bull here. He is brother to lots: 4,5, 39,40,47. He has all the good attributes of his brothers with tremendous thickness, length & extra bone. He has very good carcass EBVs with top end growth figures, carcass weight & positive fats. Look at his weight for age in the Supp sheet for an 18 month old bull. He will be a real herd improver for a top commercial herd. His dam has a 100% breeding record as well.

Top 10% Rump fat,Domestic index & Shorter gestation length.Top 20% Rib fat.Top 25% IMF. This bull is only 15 months old & look at his weight in the supp sheet. This bull is why we love Ascot Hallmark. This bull has tremendous length, thickness, depth & fleshing all at this age. These sorts of bulls should enable you to turn off progeny with greater weight for age at a younger age meaning more profit for you. He is very tight sheathed, clean coated with good bone & good scrotal size. This bull has a lot of substance & by one of our most prolific bull breeding cows that has a near perfect breeding record with 7 calves to date. She has sold sons to \$15,000 in the past. She has one of the very best & usually near first calves every year & still breeding well. This bull has been a standout since birth & is worth a second look!!We really rate him highly & ONLY 15 MONTHS OLD. Imagine him when he matures.

A bigger framed, long striding bull with extra capacity in this bull. He is slick skinned & one of the heavier bulls in the sale. He is an ET bull by Berkley out of one of our very best Millah Murrah donor cows. He has a good set of EBVs with lower birth weight , reasonable growth & with extra IMF. His dam is very fertile with 100% calving record with 6 natural calves in 8 years plus embryos .

TRAITS OBSERVED: BWT,200WT,400WT,600WT,SS,FAT,EMA,IMF

Top 15% Rump fat.Top 25% Rib fat,Shorter days to calving & Lighter birth wt. A Millah Murrah Time On son that is very deep,tight sheathed, long striding that stands on ideal bone. Another good all round bull with added advantage of high calving ease & lower birth weight EBVs which indicate he SHOULD SUIT HEIFERS or cows.

Top 10% 400D wt.Top 15% Scrotal size.Top 20% 200D & 600D wts. Top 25% Rib fat & Carcase wt. A really good style ET bull here by the Canadian champion Harvie Redemption out of a good old Gobongo donor cow now deceased. You don t see to many Redemption sons around now as semen is very rare & no longer commercially available.He is thick with good carcass traits with top 400 day weight & positive fat EBVs that we strive for in our breeding program. Vey impressive upstanding, mobile bull with clean coat, extra bone & good scrotal size.

Top 2% 200D wt,Eye muscle area, Scrotal size,Lighter Birth wt,Shorter gestation length and All indexes.Top 5% Rump fat,400D & Carcase wts.Top 10% Rib fat.Top 15% IMF & Calving Ease. Top 25% 600D wt. This is a bull we could easily have kept if we didn't have his sire. In our mind he pretty well has it all.Red factor, **DNA tested Homozygous polled**, good calving ease & lower birthweight, top end 200 & 400 day growth with low mature cow weight, big scrotal,high carcass weight, eye muscle, very positive fats & good IMF. All this with thickness, a sires head, slick coat, tight sheath, great weight for age, ideal bone, good feet & legs,moderate framed & dog quiet. His dam also has a 100% calving record. Semen retained in this bull.These complete packages don't come along very often. Should suit STUD DUTIES.

Top 1% 400D,600D & Carcase wts,Eye muscle area & Nthn terminal Index.Top 5% 200D wt,IMF,Domestic & Export Indexes.Top 10% Milk,Calving ease & Shorter gestation length.Top 25% Rump fat. Another bull here that really puts it all together like the previous bull except he is a couple of months younger & a little larger framed.Once again easily could have kept this sire but we still have his sire & dam. He has a nearly perfect set of data with his EBVs . Refer attached graph. They go from good calving ease to breed leading growth, good milk, good scrotal, very high carcass weight & EMA,position fats & high IMF.All this with a well structured, red factor bull with extra bone,good temperament,good feet & legs & very mobile. His sire is a trait leader in the breed & his dam was a Supreme Charolais exhibit at Sydney. His dam also has a 100% calving record with 6 natural calves in 8 years .Remember all important DNA tested Homozygous polled as a bonus. Top commercial or stud potential.

Top 1% 200D wt.Top 2% 600D wt & IMF.Top 5% 400D wt,Rump fat, Scrotal size & Shorter gestation length.Top 10% Rib fat,Eye muscle area & Carcase wt. This is a bull we used as a yearling in the herd we think that much of him. He combines the power & massive carcase of his sire Palgrove Headline with the softness & femininty of his dam to come up with a very useable bull. His dam was reserve champion cow at Brisbane some years back & is a donor cow in the herd.Although a

larger framed bull he does have softness & great carcass data EBVs. Top end growth ,good carcass weight, good EMA , high positive fats & high IMF. He is a strong headed, slick coated,good footed bull with tremendous depth of flank, extra length, extra bone, large scrotal & is puppy dog quiet. This bull has STUD SIRE CREDENTIALS. Inspected by some NZ studs recently there is potential for the new purchaser to sell the semen rights to NZ.

MOONGOOL ATHOL (DP2 A217E) (P/S) **DAM: 4 WAYS REFINE (SS) (4WC D45E) (P)**PALGROVE REFINE 94 (PK Z69E)

Top 1% Eye muscle & Nthn terminal index. Top 2% IMF & Rump fat. Top 5% Rib fat, 200D, 400D & Carcase wts, Shorter gestation length, Domestic & Export indexes. Top 10% 600D wt. Top 15% Milk. Top 20% Calving ease dir & Lighter birth wt. This is a bull we have liked since a calf. He is long, thick, deep & extremely soft & easy doing, and has a large scrotal size. Like most of our bulls he matches his EBVs very well. He has good calving ease, super early growth, good milk & scrotal, & even better carcass weight, EMA, Fats & IMF. A true industry focused bull. He is out of one of our favourite cows who has a 100% calving record. Don't miss this good bull.

## STANDARD STUD STOCK - AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE: All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

- 1. The highest bidder shall, subject to Conditions 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
- 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
- The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
- 4. The auctioneer expressly reserves the right, without giving any reason therefore to:-
  - (a) Refuse to acknowledge any bid;
  - (b) Withdraw any lot or lots before or during the sale;
  - (c) Exclude any person from the auction venue should it think fit.
- 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
- 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
- 7. In the event of any dispute in respect to the sale of any lot:-
  - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
  - (ii) The vendor and the purchaser shall resolve the dispute between themselves;
  - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
  - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing. The name of the vendor for whom the auctioneer acts is acknowledged to
- 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
- 9. (a) PAYMENT Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidders' offer by the vendor and prior to delivery. Notwithstanding that delivery is given to ar possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:'
  - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
  - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill RAte and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Banker's Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser for the interest rate to apply for the purpose of this condition.
- 9. (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
- 10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
- 11. Any vendor or purchaser removing the Sale Number from any lot after it

- has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
- The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
- 13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
- 14. The auctioneer may, should it think fit, make arrangements on a puchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
- 15.No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
- 16.(a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby executed. The auctioneer is not liable in respect of any error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
- 16.(b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to remain with the vendor.
- 17. In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.
- 18 (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
- 18 (b) If any vendor brings to the premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
- 19.DELIVERY. Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
- 20. In these Conditions:-
  - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
  - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
  - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
  - (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.

IMPORTANT NOTICE The Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.

All persons who attend the sale do so entirely at their risk and the Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
