SALE WITH LIVE VIDEO STREAMING

65 ANGUS BULLS | 50 CHAROLAIS BULLS

ASCOT
CHAROLAIS & ANGUS

Welcome to our 7th Annual Spring bull sale. 1PM (Qld time) Friday 21 September 2018.

We feel for anyone who, like us is suffering this intense & cruel drought period. We all need to try & look past this period however & maintain our cattle breeding operations as much as possible to normal so that we can take advantage of the industry when the drought breaks. Beef futures look very strong for later this year & all next year with prices tipped to increase to record levels again.

We would like to thank our past clients & friends for your continued support at our last Autumn sale in April this year & last year's Spring sale in September. Both were highly successful for us & presented great value for money for the buyers.

ROCKY BEEF WEEK

We would also like to thank all the people who came through our site at Rocky Beef week, We were very humbled & pleased with the amount of genuine interest we had in both our Angus & Charolais bulls on display. We had hundreds of people visit over the 5 days & also enter the draw for a \$5,000 bull sale credit. The winner, if you hadn't heard, was Sarah Godlee, Goondiwindi. Consolation prize of the Ascot RM Williams vest went to Mac Shann, Clermont. All 12 bulls on display at Rocky will be catalogued for this upcoming sale.

This year's sale also has a good line up of high quality commercially focussed bulls that we are very proud of. They have ideal bone, muscling & finishing ability for grass or feedlot production systems.

One benefit I guess we have of having one of the last major Angus & Charolais bull sales for the year (21st September) is that you can put off your bull buying till closer to when you wish to join which is closer to a season break.

As in our last sale all bulls have been **INDEPENDENTLY** structurally & temperament assessed by industry renowned assessor Jim Green. All bulls have undergone the following Ascot Quality assurance regime so you can get the Ascot Advantage:

- Independently structurally & temperament assessed & rated in catalogue
- Pesti tested negative
- Progeny of Industry leading genetics
- MSA targeted for market suitability with a focus on early weight for age, Carcass, fertility, finishing & doing ability
- All sale bulls DNA sire verified
- Vet & semen tested with Bull Breeding Soundness Certificate
- 3 germ blooded for tick fever so can go to tick areas.
- 3 day sickness vaccinated
- Vaccinated with 7 in 1, Pesti, Botulism & Vibrio
- All Registered unless advised in catalogue
- All fully Breedplan recorded to the highest standards.
- All bulls weighed & carcass scanned for EMA, IMF & fat scores prior to sale
- Polled focus with Charolais bulls tested for Homozygous polled gene where applicable
- All bulls guaranteed

ANGUS SALE BULLS

This sale consists of approx. 45 x 2 year old bulls, 10 x 18 – 20 month old bulls & 10 approx 15 month old bulls.

Bull sire lines include: Ascot Hallmark, Ascot Lion Heart L305, first sons of the \$85,000 Millah Murrah Loch Up bull, the \$150,000 Millah Murrah Kingdom bull, the \$80,000 Millah Murrah Klooney bull, Millah Murrah Highlander G7, Clunie Range Juno, Texas Global & Te Mania Emperor (Including 3 outstanding full ET brothers to Ascot Hallmark)

Many of the bulls will suit heifer joinings.

CHAROLAIS SALE BULLS

The sale consists of approx. 50 mainly mid maturity pattern 2 year old Charolais bulls which are all polled or Polled/scurred. Of these 16 are DNA tested to be homozygous polled (as per testing authority results). All bulls are by industry & carcass trait leading sires.

FREE DELIVERY

... is once again being offered to many destinations in Qld & NSW. Please refer to catalogue for details.

AUCTIONS PLUS WILL OPERATE WITH LIVE VIDEO & AUDIO.

The supplementary sheet will also be available online at www.ascotcattle.com.au prior to sale.

Please advise us or your agent if you would like a presale inspection otherwise bulls will be penned up from 9 am sale morning.

OUTSIDE AGENTS ARE MOST WELCOME WITH 4% COMMISSION APPLYING FOR CLIENTS INTRODUCED BEFORE THE SALE.

Complimentary morning tea, lunch & after sale drinks will be provided.

We look forward to seeing you at the sale.

Yours Sincerely,

Jim & Jackie Wedge.

PS. We love to hear good reports about our bulls & the following is one we would like to share with you. It is from one of our major clients & friend Nick Mather of Manumbar Past Co. Nick has many properties with approx. 5,000 mainly Bos Indicus cross females & has been buying bulls from us for many years:

"I've bought a lot of good stud bulls in my time but I haven't had any that have made an impact like Ascot has. At the recent Dalby feeder challenge Manumbar Pastoral won 1st and 2nd prizes for heifers and 1st for steers in the 200 to 300 kg class and second for heifers in the 300 to 360 Kg class. The bulls used were Ascot Angus. Thanks to Jim & Jackie Wedge for a magnificent job. If you want to breed the best, use the best bulls."

2015 Top Priced Angus \$22,000 to Nick Mather

'North Toolburra' 1123 Warwick-Allora Rd
Warwick, Queensland (also at 'Khancoban', Glen Innes NSW)

www.ascotcattle.com.au

4% Commission to outside Agents

SALE INFORMATION

SELLING SYSTEM:

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

REBATE:

4% Rebate to outside agents registering Bull buyers, in writing, PRIOR to the sale, and settling on their behalf within 14 days of the date of invoice.

PHONE BIDDING:

We have full mobile phone coverage at the sale. If you intend purchasing over the phone, please contact the selling agents to reserve a line.

GST:

All animals are sold exclusive of GST.

INSURANCE:

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for their first six months of working life. There are a number of options available through Elders Insurance at the sale venue.

While all care and attention will be taken liability of bulls falls to the purchaser at fall of hammer.

AUCTION PLUS

This year we will have live video and audio streaming all done through Auctions Plus. Please register 24hrs before the sale.

REGISTRATION:

Ownership transfer of bulls will be registered by the vendors with Angus Australia or Charolais Australia provided accurate transferee details are supplied with the Buyers Instruction form.

CATERING:

Please join us for complimentary morning tea, lunch and after sale drinks.

PHYSICAL EXAMINATION OF BULLS

All bulls and PTIC heifers offered for sale have been structurally assessed by Jim Green and vet checked. A veterinary bull breeding soundness evaluation certificate will be issued before sale date and animals only sold if deemed satisfactory for the following inspections:

- Palpation of internal genitalia
- Palpation of Scrotal Contents
- Semen Testing
- Physical examination of feet, legs, gait, head and joints.
- Structural soundness evaluation & temperament score.

TEMPERAMENT

The bulls have been handled with horses, ATV utilities and on foot. We know their temperament individually and are confident that under normal circumstances each animal in the sale is of sound temperament. Understandably each year on sale day an occasional bull misbehaves due to the big change to the yard area and the pressures of strange people invading their space.

HEALTH QA:

The bulls are ready for immediate use.

We have treated them as follows:

- Pesti tested Negative
- Double vaccinated them with Vibrovax
- Vaccinated for Tick Fever
- Double Vaccinated with 7 in 1 & Pestigard
- Double Vaccinated for 3 Day
- Drench with Cydectin Pour On prior to sale
- Botulism

JOHNES STATUS:

Each lot will have their Johnes Status listed, depending on their place of birth, as follows:

Ascot Warwick Qld property - JBas 7 (QLD, tested annually) *

Ascot Glen Innes property - JBas 7 (NSW, tested annually) *

ET calves originating from Glen Innes - JBas 6 *

*** Purchaser to ensure bull's entry eligibility meets their Johnes Status requirements. Please check with your state's relevant authority**

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

FEEDING REGIME & MANAGEMENT.

The life cycle of our bulls consists of running on crop or pasture all of their lives until just prior to sale time when they receive a high hay base ration. This ration contains a nutritionist formulated supplement with added vitamins, minerals and antioxidants for foot, fertility and

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 1pm on Friday 21 September 2018.

Bulls may be inspected from 10.00am on the morning of the sale, or at any other time by arrangement with the agents or vendor.

general health. The high roughage ration also

includes chopped hay, straw and rolled barley at very low percentages. This ration also helps adjust the rumen to help them cope with whatever pasture conditions they encounter at their new homes.

DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure the accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

WARRANTY

THE VENDOR WARRANTS THAT:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and

THE VENDOR WILL EITHER:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Ascot Cattle Co Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

WHERE:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

THE PURCHASER ACKNOWLEDGES THAT:

The purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The Seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risk associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert of bulls fighting and if one is playful with you, do not respond by patting his head.

What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

DELIVERY

Agents Elders, Landmark and Colin Say & Co will be handling the organisation of delivery of Sale Cattle. Free freight is offered to Emerald, Rockhampton, Goondiwindi, Roma, Toogoolawah, Glen Innes, Tenterfield, Inverell, Moree, Narrabri, Tamworth, Dubbo, Gunnedah & Casino.

Responsibility goes to purchaser at fall of hammer. We recommend insuring all bulls.

SEMEN RIGHTS

All bulls sell with 80% semen marketing rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands.

However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties.

Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale.

Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from a bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

ACCURACY OF CATALOGUE

While every care and attention to details in catalogue has been made we cannot guarantee that some mistakes have occurred during printing or construction of catalogue.

POLL TESTING

Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100% correct. We rely on the university to determine an animal's status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test be deemed to be incorrect.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

1. MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting'; is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level.

Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting.

Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament, and when available, selecting animals with superior Docility EBVs. Docility EBVs are estimates of genetic differences in the percentage of an animal's progeny that will be scored with acceptable temperament, with higher EBVs associated with superior temperament. For example, an animal with an EBY of +20% would be expected to on average produce a greater percentage of progeny that have acceptable temperament than a bull with an EBY of -2%.

Research has also demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency.

Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +4.4 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of + 1.0 mm, relative to carcass weight.

2. RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs.

A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance.

In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal.

Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +0.4 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.6 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal.

Selection of animals with acceptable temperament, higher Docility EBVs, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd.

To further discuss breeding for MSA programs, please contact staff at SBTS and TBTS. More information about Meat Standards Australia is also available from the MLA website

www.mla.com.au.

WORKING AGE YEARLINGS BECOMING POPULAR

In Australia and other parts of the world, there is a trend towards using bulls at yearling age (12-18 months). This allows introduction of superior genetic material into herds a year earlier than normal, resulting in faster genetic improvement.

Their introduction has the potential to allow breeders to extend the working lives of bulls by a year or more, lowering the bulls costs of a herd. This extra workload is achieved at the time in their lives when they are young, lean, fit and exuberant. They are free of the structural problems that beset older bulls.

Yearling bulls have much to offer, both genetically and financially. However, poor management can reduce calving percentages, compromise animal welfare and limit their lifetime potential. In order to harness the immense potential of yearling bulls, special management is required-their age and physiological status demands it.

SUMMARY

In order to harness the potential of yearling bulls there are three crucial management requirements:

1. Join them either alone or with bulls of the same age.
2. Join yearling bulls for 6-8 weeks (2 cycles) only, then spell them for at least 3 months.
3. After removing yearling bulls from their joining groups, place them on high quality feed in specially prepared paddocks.

Experience has shown that many young bulls have been ruined because they have been joined for too long and under conditions that have challenged their survival. If, at any stage, yearling bulls drop below 2 score condition, they should be withdrawn from their joining group immediately.

HOMOZYGOUS POLLED

All animals stated as Homozygous polled in this catalogue have been tested with the SEQ_POLL Prediction test at AGL, University of QLD prior to sale, and are PcPc or PcPf Homozygous.

HOMOZYGOUS POLLED EXPLAINED

Recently, candidate mutations associated with polled phenotype in European breeds of cattle were found. There are two independent origins of polled, one found in Holstein-Friesian and Jersey breeds (Pf), the other in many European breeds of Celtic origin (Pc) such as Angus, Blonde d'Aquitaine, Dexter, Limousin, Charolais and Hereford, among others. Polledness is dominant; a polled animal can have one or two copies of the gene. All offspring of a bull with two copies of polled (homozygous) will be polled. Genetic testing is a cost effective means to determine if a polled animal has 1 or 2 copies of the gene.

Pc/Pc Polled. Two copies of the Polled-Celtic molecular marker are present. All offspring will be polled.

Pc/Pf Polled. One copy of the Polled-Celtic and one copy of the Polled-Friesian molecular markers are present. All offspring will be polled.

Reference:

Medugorac I, D Seichter, A Graf et al. Bovine Polledness – An autosomal dominant trait with allelic heterogeneity. PLoS One 7(6): e39477, 2012. (as supplied by AGL, UQ, Gatton, Q.)

Poll testing: Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100 % accurate. We rely on The University to determine an animals status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test deemed to be incorrect.

GENETIC DIVERSITY
FOR YOUR HERD.

2018 CHAROLAIS BREEDPLAN

2018 ANGUS BREEDPLAN

GENETIC INVESTMENT

- Renowned for investing in leading Charolais and Angus genetics
- Search Australia and the world to source genetics that meet their high breeding standards
- Ascot sires are now being used as AI sires throughout Australia & New Zealand

PERFORMANCE FOCUS

- Weight is money
- Focused on cattle that can grow quickly to MSA standards
- Breeding decisions are made with MSA carcass traits as our main focus
- Phenotype is a major part of our breeding program.
- Our bulls are quiet, thick, polled, have great skin type and exhibit good weight for age

POLLED FOCUS

- Polled cattle is a major focus at Ascot
- All PURE Angus are naturally polled, extremely attractive for commercial cross breeding programs
- Aim is to have a totally polled (nearly achieved) and eventually a totally homozygous polled herd
- We conduct a homozygous polled testing program

FERTILITY FOCUS

- Cattle are designed to breed and perform in a range of Australian climates
- Breeding herd is put under strict fertility pressure from conception to weaning.
- Non-performing females are culled, which makes for a very fertile herd

DATA & MEASUREMENT

- We weigh nearly every calf ensuring data accuracy
- We hold a 5-star rating for recorded traits for the Charolais Breed
- We submit data to the highest standard available with the Angus breed
- Ultrasound scanning for EMA, IMF% and fat cover is used for submission to Breedplan
- We supply this data to clients prior to sales

QUALITY ASSURANCE

- Every animal sold at Ascot is independently assessed for feet, structure and temperament by Jim Green
- All bulls are semen tested and vetted for soundness
- Vaccinated for Pesti Virus, 7 in 1, 3 day, tick fever, Botulism and Vibrio.
- Every animal sold comes with a fertility guarantee, plus our great after sales service and support

MARKET SUITABILITY

- MSA grading is the basis to our selection criteria
- Our bulls will add carcass value and eating quality to your progeny
- We select for early weight for age, positive fat cattle, (for both fertility and finishing ability) and for cattle that can exhibit marbling
- Our breeding program is a balance between carcass EBV's & phenotype

STRUCTURAL ASSESSMENT AT ASCOT

Jim Green – 0402 003 137

At Ascot we are 'Raising the Bar'

All sale bulls & PTIC females will be independently assessed for feet, structural soundness & temperament by industry renowned accredited assessor Jim Green. Jim Has over 20 years' experience in doing this & this is all he does. He does it for many seed stock producers all over Australia. As can be expected he knows his stuff!! Each animal will have its structural & docility result stated in our sale catalogue. We feel this is one more way we can give our buyers more comfort & confidence in the animals we are selling.

Good structure in cattle has a direct effect on growth and

reproductive performance of a beef herd. Structural problems have detrimental effects on longevity, conception rates, calving timeframes and therefore directly impact on profitability.

Leg and feet issues, and temperament are highly heritable, therefore identifying animals with these issues allows you to improve your herd through assessment and selection.

At Ascot, independently assessing structure and temperament, measuring and collecting data, along with the use of performance recording gives us a better picture of how individual animals perform. This aids genetic selection and helps us breed animals with desirable traits.

SCORING DIAGRAM

1-9 Scoring System for feet and leg structure

- A score of 5 is ideal. (Note: Temperament score of 1 is ideal)
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals
- An animal scoring 4 or 6 would be acceptable in any breeding program
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing
- A score of 1 or 0 should not be catalogued and are considered immediate culls

Temperament

Temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet score '1'. Animals that are aggressive and extremely agitated in the crush score as '5'.

EBV Percentiles for ASCOT HALLMARK H147(AI)

COMMENTS

Angus Sire Benchmarking Program Cohort 5 – Hallmark is rated No.5 for 200D wt, No.7 for 400D wt, No.2 for 600D wt, No.5 for Rib Fat and No.2 for Rump fat.

Outstanding sire for the future by Te Mania Emperor out of a Millah Murrah D108 daughter.

Great temperament, good bone and great muscling complement his sire's outlook. Good footed. Tight sheath. Huge scrotal. Frame score 7.

- Growth: Top 1% 200, 400 & 600D & Carcase Wts
- Carcase: Top 5% Rump Fat, Top 15% IMF
- Fertility: Top 2% Scrotal size
- Indexes: Top 2% ABI, Heavy Grain & Grass Indexes

Top 1% 200,400,600 day wts,scrotal size,carcass wt, angus & heavy grass indexes. Top 20% shorter gestation length & days to calving.This bull was one of the real crowd favourites on display at our site at Rocky Beef week. Tremendous length, bone,huge weight for age (proving his top 1% growth EBVs) with a slick hair type.He is nearly a spitting image of his sire, the now renowned Ascot Hallmark. This bull was a heifer's first calf. Massive sires head, extra muscle & near perfect sheath, this bull has real presence. STUD SIRE POTENTIAL. A colossus of a bull.I'm taking a bit of a risk puting him up as lot 1 so dont miss this great opportunity!!!

Top 10% 600 day wt, milk, Heavy grass index & carcass wt.Top 20% lower birth wt, 400 day & carcass wt. A very well balanced, slick coated young bull by the Clunie Range Juno sire whos sons sold very well at our Autumn sale in April. A very quiet bull. Would suit the grass fed market & EBVs indicate he SHOULD SUIT HEIFERS OR COWS.Dam has 100% calving record.

Top 10% 200,400,600 day Wts & feed efficiency. Above breed average Days to calving, carcass wt, Eye muscle, Retail yield & IMF. By the Australian record priced angus bull Millah Murrah Kingdom (sold for \$150K) & out of a cow we bought as a heifer from the Aberdeen dispersal for \$14,000, this bull is nearly perfectly put together. We don't normally show our cattle but we decided to show just 1 at Rocky Beef week 2018 - this bull. He won his class & was Reserve Junior Champion. Testament to his structure & type. A quieter & more balanced bull would be hard to find. Near perfect structural scores with slick skin type, extra bone with tremendous carcass. Dam (now deceased) had a 100% calving record. A bull we really like - he has STUD SIRE POTENTIAL.

Top 10% 400,600 day Wts, days to calving, Angus, heavy grain & heavy grass indexes. Top 20% days to calving & IMF. Above breed average 200 day wt, scrotal size, Carcass wt & fats. Another FULL ET BROTHER TO ASCOT HALLMARK H147 he is very similar to his full brother Lot 4 & arguably better. Another favourite at Beef Rocky, we had as many people prefer him to lot 4 so just shows the strength of this pedigree. This bull has good structural scores including excellent sheath set, has slick skin type with ideal bone & muscling. His dam who has a very good reputation for breeding stud sires has a 100% calving record. Another bull worthy of STUD SIRE POTENTIAL.

Top 5% Scrotal size, days to calving & angus breeding index. Top 10% 400,600 day wts, rump fat. Top 20% rib fat & IMF. Yet ANOTHER FULL ET BROTHER TO ASCOT HALLMARK. If you missed the previous 2 brothers have a look at this well balanced boy. They are so hard to choose between. Well structured, smooth muscled, good temperament, with slick skin & large scrotal. Very worthy of STUD SIRE CONSIDERATION. Great overall bull again.

6	6	6	6	4	5	5	1

Top 5% 200,400,600 day wts. Top 10% Feed efficiency. Top 20% Carcass Wt, Angus breeding, heavy grain & heavy grass indexes. Top 25% Eye muscl. Above breed average days to calving, & IMF. An ET full brother to lot 5 by the \$150,000 Kingdom sire. Bred in the purple again. Near perfect structural scores with tight, good sheath structure, good temperament, clean skinned, & good thickness. Good overall balance in this bull with EBVs & structure. Dam had 100% calving record. Worth a second look.

TRAITS OBSERVED: BWT,200WT,400WT(x2),600WT(x2),SS,FAT,EMA,IMF

Above breed average Gest length,scrotal size,days to calving,Rib & Rump fats. Another very exciting young calf.At only 14 months, he is one of the first calves to be sold in Australia by Millah Murrah Loch Up, a bull we purchased at the Millah Murrah 2016 sale, at the top price of \$85,000. Loch Up is a main stream AI sire being used throughout Australia now through ABS.We think a lot of this young bull & one of my favourites in the whole sale draft. He is an extremely thick bull with good bone,strong head & good top line. An early maturing , good natured bull with good structural scores. Worthy of a second inspection & STUD POTENTIAL. Dam has a 100% calving history. This bull has a full Millah Murrah pedigree. This is a sample of a whole line of Loch Up Calves we will be presenting in our Autumn & Spring sales next year as 18 month & 2 year olds. Loch Up is breeding extraordinarily well for us.Imagine what this bull will look like as a 2 year old.

Top 1% 200 day wt. Top 5% 400 day wt & IMF. Top 10% Gest length, 600 day wt & Rump fat. Top 20% carcass wt & rib fat. Above breed average Scrotal size & eye muscle. A cracking good **HOMOZYGOUS POLLED** son of Ascot Juggernaut, who sold for \$30,000 to Nick Mather in 2016, this bull has slick coat & good sires outlook. Very good structural scores with nice tight pissle & high growth, positive fats & good IMF EBVs. Out of one of our favourite dams who has one of the best calves every year. She hasn't disappointed here again. Extra muscle, tremendous thickness especially from behind with tremendous bone but still highly positive for fats in this great young bull. Full of meat behind the shoulders & right down to his hocks. A STUD SIRE PROSPECT in our view. A slightly younger bull here, don't over look him. I am taking a gamble putting him up as the first charolais lot as he could be the best Charolais bull in sale. Don't miss him just because he is first Charolais.

Top 1% 200 day wt & eye muscle area. Top 10% 400, 600 day & carcass wts, scrotal size & retail yield. Above breed average IMF. Huge growth EBVs with this powerful young bull. Extra thick right through & has as close to perfect structural score as you can get with nice tight pissle & slick skin type as well. Tremendous power & width through hind quarter. His sire who we sold for \$15,000 to Nick Mather is working well for us through our AI program. His dam has a 100% calving record. Another favourite of most that see him.

Top 5% 200 day wt. Top 10% scrotal size, rib & rump fats & IMF. Top 20% EMA. Above breed average Gest length, lower birth weight, 400,600 day & carcass wts. Great spread of carcass performance EBVs from high growth, good EMA, very good fats & IMF with this great young bull. He is extremely soft & easy doing backed up by his very positive fat EBVs. By the \$30,000 Grand champion bull Ascot Juggernaut he is **HOMOZYGOUS POLLED**. He is extremely quiet with sires head & with near perfect structural report card. Add that he is RED factor with very slick hair type - he ticks all the boxes. He was one of, if not the most favourite bull at our display at Rocky Beef. A bull that is a definite STUD SIRE. He is More Than Ready to go do a great job for anyone. He will be hard to part with. SEMEN RETAINED.

Top 5% Rump fat & IMF. Top 10% 200,400,600 day wts & Rib fat. Above breed average Milk, carcass wt & Scrotal size. Another stand out bull with good Carcass EBV's. A very positive fat, easy doing bull backed up by his Ebvs. This bull has EXTRA BONE, good strength of spine & frame size, and a quieter bull will be hard to find. Puppy dog quiet. A very good structural score with nice tight pizzle as well. A clean coated bull that was equal favourite in the popularity quest at Rocky Beef. He is possibly my personal favourite Charolais in the sale. Being **HOMOZYGOUS POLLED** as a bonus makes him a STUD SIRE PROSPECT for sure in our minds. As per Lot 69 he is by Ascot Juggernaut out of a near perfect female, whose udder is one of the best I have seen. Great opportunity not to be missed here. SEMEN RETAINED.

Top 5% Gest length,200 & 400 day wts,Scrotal size,Northern Terminal index.Top 10% Lower birth weight, 400,600 day & carcass wts,EMA,Rib & Rump fat,IMF,Domestic & export indexes. Above breed average milk. What a magic set of EBVs with this bull. Nearly couldn't ask for better. Lower birth weight to top end growth with excellent EMA , Fats & IMF. It is hard to get Charolais with these carcass data sets.We used this bull lightly in the herd last year as we think that much of him. Being DNA TESTED **HOMOZYGOUS POLLED** & RED FACTOR make him very useable as STUD POTENTIAL or top end commercial bull. He is full of red meat with tremendous carcass. Very easy doing (backed up by his very high positive fat EBVs) he hardly lost any condition during joining in a tough season. Solid structural scores with nice pissle structure as well. He is fine coated & the darker red colour that should throw a higher percentage of red calves you would think. By Ascot Eldorado & out of one of our best cows in the herd. Don't miss this great bull.SEMEN RETAINED.

Another Juggernaut son with great spread of performance data from lower birth weight,high growth, very positive fats & high IMF. This is a bull I have liked from a calf, by a now 17 year old Palgrove Mac donor cow who we flushed last week for 13 A-grade embryos.This bull was her second last natural calf and she has had a 100% calving record until now with 19 progeny to her name. We continue to flush her to try & breed on her longevity. She still has perfect feet,udder & still retains body weight.Hopefully this young bull will have built in longevity as well. Red factor, polled with extra length, good bone & good temperament he is one of the better bulls. Stud Potential here.

Top 5% Calving ease dir,Gest length,lower birth weight,Scrotal size,Rump fat,All indexes. Top 10% 400,600 day wts,Milk, Rib fat & IMF. Above breed average 200 day & carcass wts. Once again tremendous spread of carcass EBVs from low birth to good growth, positive fats & high IMF.This bull,along with most others in the sale with these sorts of data spreads,are very much MSA targeted. Tremendous weight for age in this bull to back up his Ebv's. One of the heavier bulls & highly positive fat with extra softness, clean skinned & very thick right through. Another Palgrove Justify son with good structural scores including tight pizzle out of a cow with 100% calving record. A good bull here.

TRAITS OBSERVED: CE,BWT,200WT,400WT,600WT(x2),SS,FAT,EMA,IMF

Top 5% 400, 600 day & carcass wts & all indexes, Top 10% 200 day wt, Milk. Above breed average Calving ease, lower birth wt, Scrotal size, EMA & rib & rump fats & IMF. Tremendous balance of carcass EBVs with this bull from lower birth weight, good growth, positive EMA, fats & IMF. It is hard to get all these together. Good weight for age, clean coat & strong polled head plus near perfect structural scores make him a very useable bull. By Ascot Galaxy & out of a powerful Moongool foundation cow with 100% calving record. Good all round package with extra bone & softness. Good Bull.

Thank you for attending our Spring 2018 Bull Sale

ASCOT CATTLE CO

67

LOT 69

ASCOT MORE-THAN-READY M612E

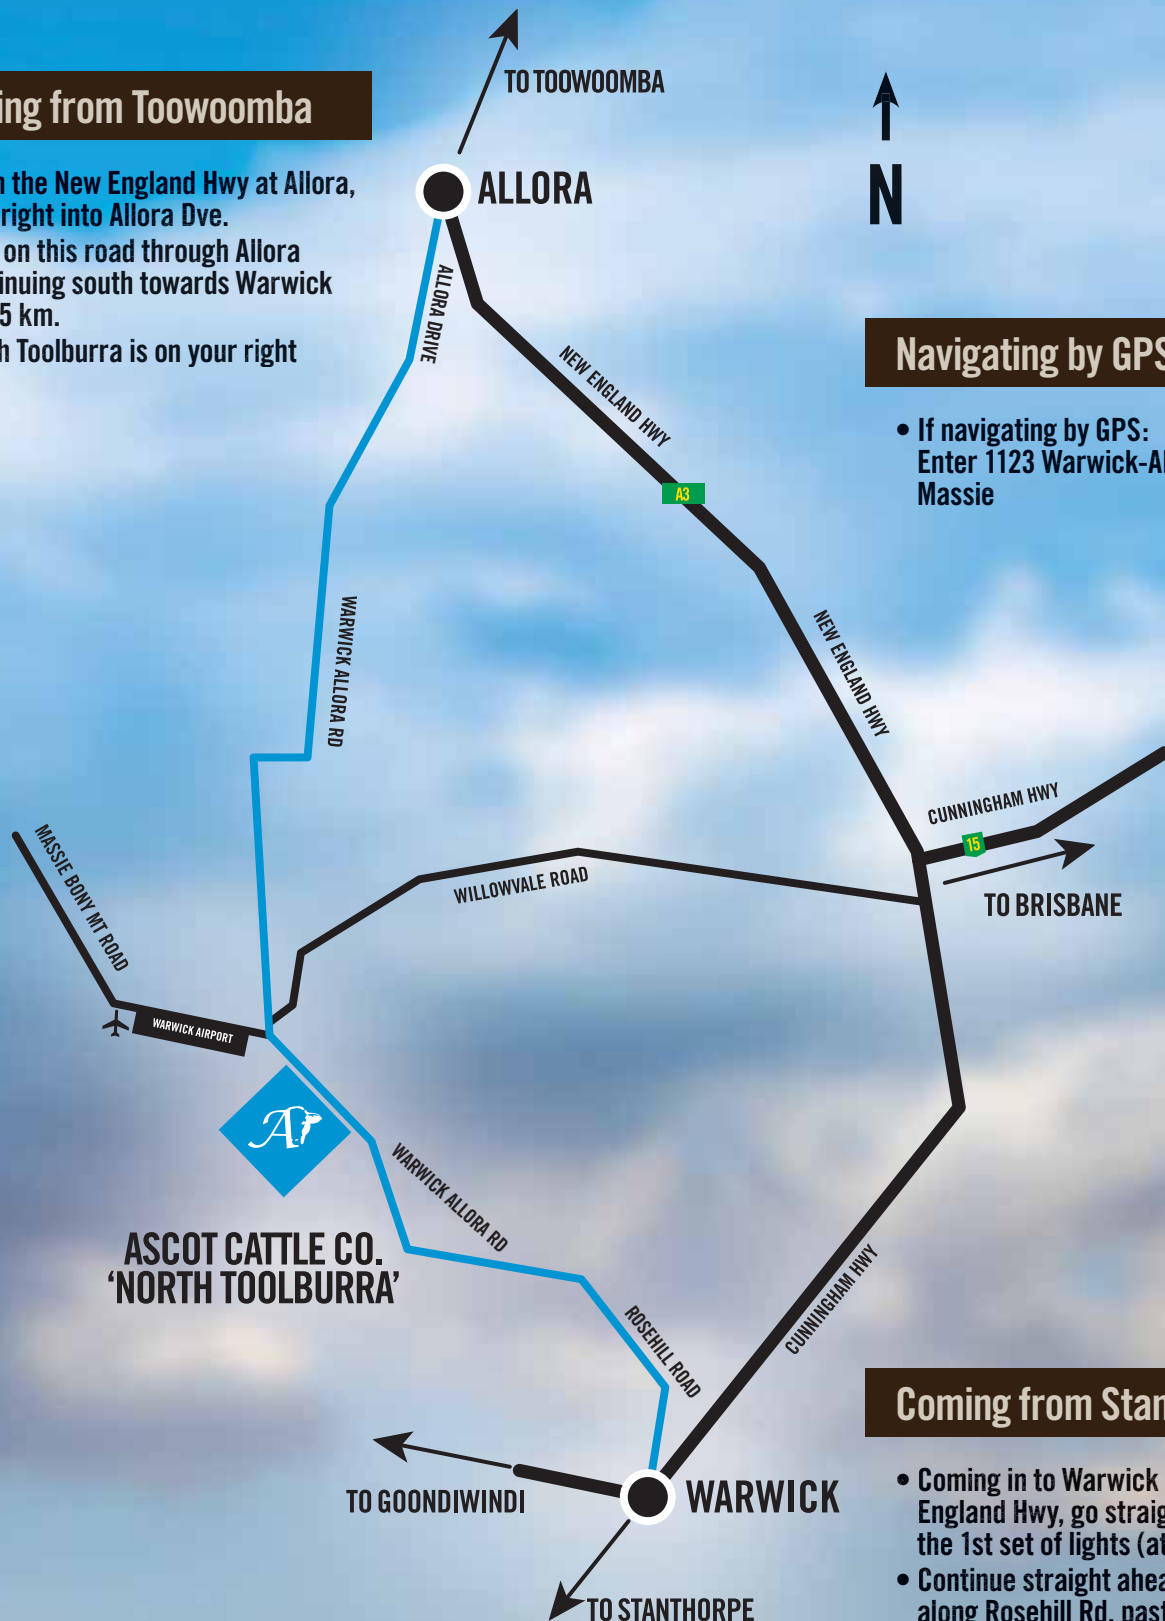

HOW TO GET THERE

ASCOT

Coming from Toowoomba

- From the New England Hwy at Allora, turn right into Allora Dve.
- Stay on this road through Allora continuing south towards Warwick for 15 km.
- North Toolburra is on your right

Navigating by GPS

- If navigating by GPS:
Enter 1123 Warwick-Allora Road,
Massie

Coming from Stanthorpe

- Coming in to Warwick on the New England Hwy, go straight ahead at the 1st set of lights (at Wood St.).
- Continue straight ahead along Rosehill Rd, past the Racecourse, and past John Dee Meatworks.
- Follow this back road to Allora for 9km past the meatworks.
- North Toolburra is on your left.

QUEENSLAND LIVESTOCK AGENTS ASSOCIATION LIMITED

STANDARD STUD STOCK - AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE: All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

1. The highest bidder shall, subject to Conditions 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
 3. The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
 4. The auctioneer expressly reserves the right, without giving any reason therefore to:-
 - (a) Refuse to acknowledge any bid;
 - (b) Withdraw any lot or lots before or during the sale;
 - (c) Exclude any person from the auction venue should it think fit.
 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
 7. In the event of any dispute in respect to the sale of any lot:-
 - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
 - (ii) The vendor and the purchaser shall resolve the dispute between themselves;
 - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
 - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing.
 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
 9. (a) **PAYMENT** - Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidders' offer by the vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:-
 - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
 - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill Rate and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Banker's Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser for the interest rate to apply for the purpose of this condition.
 - (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
11. Any vendor or purchaser removing the Sale Number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
12. The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
14. The auctioneer may, should it think fit, make arrangements on a purchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
15. No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
16. (a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby executed. The auctioneer is not liable in respect of any error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
- (b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to remain with the vendor.
17. In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.
18. (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
- (b) If any vendor brings to the premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
19. **DELIVERY.** Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
20. In these Conditions:-
 - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
 - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
 - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
 - (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.
- IMPORTANT NOTICE** The Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.
- All persons who attend the sale do so entirely at their risk and the Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
