

ASCOT BULL SALE

FRIDAY 18TH SEPTEMBER 2020

 **ASCOT**
CHAROLAIS & ANGUS

125 POLLED BULLS
ON-PROPERTY 'NORTH TOOLBURRA' WARWICK QLD

Welcome to the Ascot Spring bull sale. Firstly, thank you to all our previous buyers & supporters.

Our on-property sale will proceed following Covid 19 protocols similar to our April sale which ran very smoothly. Our Covid Safe protocol is outlined on Page 7.

The sale will be A LIVE AUCTION ON PROPERTY plus interfaced with AUCTIONS PLUS WITH LIVE VIDEO & AUDIO. As well as photos we will have a video of every sale bull on our website & the Auctions plus site to make remote bidding easier. PHONE BIDDING VIA AGENTS WILL ALSO BE AVAILABLE. 4% COMMISSION PAID TO OUTSIDE AGENTS.

We are very excited about the cattle industry as it is certainly in a great space with most people coming out of drought with demand & good prices looking like remaining for the long-term future.

We are very pleased with our line-up of all polled bulls in this sale with 63 angus bulls comprising 45 rising 2 year olds & 17 x 16 to 18 month old bulls. The 62 Charolais bulls consist of 42 x 2 year olds & 20 x 16 to 18 month olds.

Included in this will be approx. 40 bulls that should suit heifer joinings & 31 of the 62 polled Charolais bulls are homozygous polled.

All bulls are fresh off 6 months on pasture & have grown out well & now on a mild sale prep ration.

Bulls are raised in QLD for Qld conditions.

THE ASCOT BALANCE.

MSA carcass focus, fertility, high weight for age, fleshing combined with polledness & structural integrity equals the Ascot balance.

STRUCTURAL ASSESSMENT & QUALITY ASSURANCE

Ascot is a Johnes J bas 7 herd, tested annually. The majority of the bulls are eligible to go anywhere in Australia including WA. Please refer to our catalogue for each bull's status. Bulls eligible for entry to WA will be marked WA ELIGIBLE.

In addition, all bulls are:

- Independently assessed for structure & temperament by industry expert Jim Green.
- Vet checked & semen tested by Ced Wise veterinarians. A bull breeding soundness certificate is issued with every bull.
- Blooded for tick fever
- Vaccinated for 3 day sickness, 7 in 1, pestivirus, botulism & vibrio.
- Ascot is a tested pesti free herd
- All bulls scanned for fats, EMA & IMF, scrotal size as yearlings & fully breedplan recorded.
- DNA sire verified
- Scanned again prior to sale for fat cover, EMA & IMF & scrotal size.

ANGUS SALE BULLS.

The sale features sons of the following breed leading sires from Australia & Overseas:

New sires: LD Capitalist a moderate birth weight sire which adds tremendous fleshing & thickness, Nampara Liberty producing bulls with tremendous carcass & beautiful females & Clunes Crossing Dusty M13 one of the highest rated carcass trait sires in the breed adding breed leading growth, EMA & IMF.

Tried & proven breed leading reference sires include: Ascot Hallmark, Ascot Lionheart, Millah Murrah Loch Up, Coonamble Hector, SAV International, Clunie Range Kahlua, Clunie Range Juno, Texas Global, Nampara Liberty, & K5X Legend.

There are quite a number POTENTIAL HEIFER BULLS which will be identified in catalogue & supplementary sheet.

CHAROLAIS SALE BULLS.

The sale features sons of the following breed leading homozygous polled sires from Australia & Overseas:

New Sires: Ascot Masterpiece, Palgrove Lustre, Ascot Hired Hand, Charnelle Louis & Paringa Linked In.

Tried & Proven sires: Ascot Juggernaut, Rosedale Lump Sum, Palgrove Kudos, Paringa Kilo Packer, Ascot Kingmaker & Ascot Eldorado.

A number of the Charolais bulls in sale are POTENTIAL HEIFER BULLS which will be identified in the catalogue & supplementary sheets.

FREE DELIVERY TO MANY MAJOR CENTRES IN QLD & NSW WILL BE AVAILABLE AS USUAL. REFER CATALOGUE FOR DETAILS.

Supplementary sheets with weights, fat scans & EMA scans, scrotal sizes etc will be available approx. 1 week before the sale on our website.

A NOTE ABOUT FUTURE SALES

IN 2021 WE WILL NO LONGER HOLD AN AUTUMN SALE IN APRIL. INSTEAD WE WILL FOCUS ON A LARGER SPRING SALE ANNUALLY IN SEPTEMBER.

Complementary morning tea, Lunch & after sale refreshments will be provided on sale day – adhering to covid-safe protocols.

We are excited to catch up with everyone on sale day. Inspections from 10 am with sale starting at 1PM Qld time, Friday, 18th September.

Yours Sincerely,
Jim & Jackie Wedge.

Reaping Angus Rewards – Kindee embraces Angus

In recent years Kindee Pastoral co has used genetics from Ascot Angus, Warwick QLD.

Kindee Pastoral is made up of 2 properties in Central QLD -15,000 acres at Cowangah, Taroom & 25,000 acres at Muya, Injune

"The Angus bulls are very good for our 1st calving heifers. Ascot Angus put the time & resources into their genetics & are a bit more intuitive & innovative with their breeding than others. They buy a lot of outside genetics & they like to keep ahead of the game" said Andrew Murray.

Andrew, together with his brother Stuart and their mother Janie, run the company.

On 30th June this year, for the first time in Kindee's history, cattle were sold at the Roma saleyards in combination with AuctionsPlus. A total of 1400 Angus/Santa/Charolais weaners were sold, with steers averaging 450c/kg and heifers 420 c/kg.

"We had 800 steers & 600 heifers – the heifers weighed an average of 290kg & the steers 310kg.

"We turn grass into meat & meat into money"

Ascot paves the way for a successful cross – Maree Duncombe, Conondale Station

A regular at the winner's circle at Gympie's annual weaner sales, Maree Duncombe attributes the success of her Charbray cattle firmly back to the Charolais genetics she sources from Ascot stud.

Each year the young breeder travels from her 930 Ha Conondale Station to Warwick & returns with at least 2 Charolais bulls from the Wedge family's annual Ascot Bull sale.

These are used over her herd of 350 Brahman females to produce about 300 Charbrays annually

Ms Duncombe has switched the focus from growing out steers to producing top quality weaners that are primarily sold to commercial breeders.

Managing cattle on her own, makes temperament and the homozygous poll gene the key traits she looks for in Ascot bulls & she said the sires from the stud deliver every time. "At a bull sale I don't really look at the objective measurements, because I know Ascot is breeding for the key things I am looking for" she said.

"The Ascot bulls acclimatise very well to my high rainfall environment – I can put them to work straight away. Ms Duncombe said the 'proof was in the pudding' & she would keep using Ascot's Charolais genetics in the future, without changing her breeding direction. It's working for me & I am getting success in the market"

Conondale has won the champion pen of heifers for the past 3 years at the annual Gympie weaner sale, and this year received a top price of almost \$1300/head – The best average she has ever achieved. A line of heifers weaned during the 2019 winter drought reached a top price of \$1400.

'North Toolburra' 1123 Warwick-Allora Rd
Warwick, Queensland (also at 'Khancoban', Glen Innes NSW)

www.ascotcattle.com.au

4% Commission to outside Agents

SALE INFORMATION

SELLING SYSTEM:

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

REBATE:

4% Rebate to outside agents registering Bull buyers, in writing, PRIOR to the sale, and settling on their behalf within 14 days of the date of invoice.

PHONE BIDDING:

We have full mobile phone coverage at the sale. If you intend purchasing over the phone, please contact the selling agents to reserve a line.

GST:

All animals are sold exclusive of GST.

INSURANCE:

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for their first six months of working life. There are a number of options available through Elders Insurance at the sale venue.

While all care and attention will be taken liability of bulls falls to the purchaser at fall of hammer.

AUCTION PLUS

This year we will have live video and audio streaming all done through Auctions Plus. Please register 24hrs before the sale.

REGISTRATION:

Ownership transfer of bulls will be registered by the vendors with Angus Australia or Charolais Australia provided accurate transferee details are supplied with the Buyers Instruction form.

CATERING:

Please join us for complimentary morning tea, lunch and after sale drinks.

PHYSICAL EXAMINATION OF BULLS

All bulls and PTIC heifers offered for sale have been structurally assessed by Jim Green and vet checked. A veterinary bull breeding soundness evaluation certificate will be issued before sale date and animals only sold if deemed satisfactory for the following inspections:

- Palpation of internal genitalia
- Palpation of Scrotal Contents
- Semen Testing
- Physical examination of feet, legs, gait, head and joints.
- Structural soundness evaluation & temperament score.

TEMPERAMENT

The bulls have been handled with horses, ATV utilities and on foot. We know their temperament individually and are confident that under normal circumstances each animal in the sale is of sound temperament. Understandably each year on sale day an occasional bull misbehaves due to the big change to the yard area and the pressures of strange people invading their space.

HEALTH QA:

The bulls are ready for immediate use.

We have treated them as follows:

- Pesti tested Negative
- Double vaccinated them with Vibrovax
- Vaccinated for Tick Fever
- Double Vaccinated with 7 in 1 & Pestigard
- Double Vaccinated for 3 Day
- Drench with Cydectin Pour On prior to sale
- Botulism

JOHNES STATUS:

Each lot will have their Johnes Status listed, depending on their place of birth, as follows:

Ascot Warwick Qld property - JBas 7 (QLD, tested annually) *

Ascot Glen Innes property - JBas 7 (NSW, tested annually) *

*** Bulls eligible to enter WA will be marked WA ELIGIBLE. Purchaser to ensure bull's entry eligibility meets their Johnes Status requirements. Please check with your state's relevant authority.**

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

FEEDING REGIME & MANAGEMENT.

The life cycle of our bulls consists of running on crop or pasture all of their lives until just prior to sale time when they receive a high hay base ration. This ration contains a nutritionist formulated supplement with added vitamins, minerals and antioxidants for foot, fertility and

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 1pm on Friday 18th September 2020.

Bulls may be inspected from 9.00am on the morning of the sale, or at any other time by arrangement with the agents or vendor.

general health. The high roughage ration also

includes chopped hay, straw and rolled barley at very low percentages. This ration also helps adjust the rumen to help them cope with whatever pasture conditions they encounter at their new homes.

DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure the accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

WARRANTY

THE VENDOR WARRANTS THAT:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and

THE VENDOR WILL EITHER:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Ascot Cattle Co Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

WHERE:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

THE PURCHASER ACKNOWLEDGES THAT:

The purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The Seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risk associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert of bulls fighting and if one is playful with you, do not respond by patting his head.

What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

DELIVERY

Agents Elders, Landmark and Colin Say & Co will be handling the organisation of delivery of Sale Cattle. Free freight is offered to Emerald, Rockhampton, Goondiwindi, Roma, Toogoolawah, Glen Innes, Tenterfield, Inverell, Moree, Narrabri, Tamworth, Dubbo, Gunnedah & Casino.

Responsibility goes to purchaser at fall of hammer. We recommend insuring all bulls.

SEMEN RIGHTS

All bulls sell with 80% semen marketing rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands.

However, by keeping a 20% share, it gives us, as the breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties.

Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale.

Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from a bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

ACCURACY OF CATALOGUE

While every care and attention to details in catalogue has been made we cannot guarantee that some mistakes have occurred during printing or construction of catalogue.

POLL TESTING

Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100% correct. We rely on the university to determine an animal's status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test be deemed to be incorrect.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

1. MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting'; is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level.

Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting.

Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament, and when available, selecting animals with superior Docility EBVs. Docility EBVs are estimates of genetic differences in the percentage of an animal's progeny that will be scored with acceptable temperament, with higher EBVs associated with superior temperament. For example, an animal with an EBY of +20% would be expected to on average produce a greater percentage of progeny that have acceptable temperament than a bull with an EBY of -2%.

Research has also demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency.

Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +4.4 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of + 1.0 mm, relative to carcass weight.

2. RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs.

A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance.

In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal.

Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +0.4 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.6 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal.

Selection of animals with acceptable temperament, higher Docility EBVs, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd.

To further discuss breeding for MSA programs, please contact staff at SBTS and TBTS. More information about Meat Standards Australia is also available from the MLA website

www.mla.com.au

WHO'S YOUR DADDY?

WHY SIRE VERIFY?

At Ascot we Sire Verify all our sale bulls to ensure that the bull you are investing in is as portrayed in the catalogue. Why is this important?

You are making an investment in genetics. These genetics, or pedigree of the animal you are buying, need to be independently verified as correct, not what we think it is.

FIT FOR PURPOSE:

An example - You are looking for a bull with certain EBV's for calving ease and low birthweight - if the bull you purchase was by a different sire to what was thought, then these values would be incorrect. He may have poor calving ease & high birthweight - not desirable if you were needing a bull to join with heifers for instance.

Another scenario - You have chosen to invest in a bull with particular traits - fat, muscle or marbling for example to influence your herd. If the bull you have selected is not sire verified, then there may be a possibility of it having different carcass trait values altogether.

EBV's are influenced by historical data from the animal's pedigree, so an incorrect pedigree means incorrect EBV's. This then is an issue as the bull you have purchased is not fit for the purpose you intended.

At Ascot we strive to give as much accurate information as we can. As well as all measurements collected and submitted to the breed society, we submit DNA to identify pedigree, and also the homozygous polled gene in our Charolais herd, to give you as much information as we can to help you in making your purchase.

Parts of this article provided with the permission of AA

HOMOZYGOUS POLLED

All animals stated as Homozygous polled in this catalogue have been tested with the SEQ_POLL Prediction test at AGL, University of QLD prior to sale, and are PcPc or PcPf Homozygous.

HOMOZYGOUS POLLED EXPLAINED

Recently, candidate mutations associated with polled phenotype in European breeds of cattle were found. There are two independent origins of polled, one found in Holstein-Friesian and Jersey breeds (Pf), the other in many European breeds of Celtic origin (Pc) such as Angus, Blonde d'Aquitaine, Dexter, Limousin, Charolais and Hereford, among others. Polledness is dominant; a polled animal can have one or two copies of the gene. All offspring of a bull with two copies of polled (homozygous) will be polled. Genetic testing is a cost effective means to determine if a polled animal has 1 or 2 copies of the gene.

Pc/Pc Polled. Two copies of the Polled-Celtic molecular marker are present. All offspring will be polled.

Pc/Pf Polled. One copy of the Polled-Celtic and one copy of the Polled-Friesian molecular markers are present. All offspring will be polled.

Reference:

Medugorac I, D Seichter, A Graf et al. Bovine Polledness - An autosomal dominant trait with allelic heterogeneity. PLoS One 7(6): e39477, 2012. (as supplied by AGL, UQ, Gatton, Q.)

Poll testing: Ascot Charolais bulls have been tested by the Animal Genetics laboratory at the University of Qld with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100 % accurate. We rely on The University to determine an animals status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test deemed to be incorrect.

STRUCTURAL ASSESSMENT AT ASCOT

Jim Green – 0402 003 137

At Ascot we are 'Raising the Bar'

All sale bulls & PTIC females will be independently assessed for feet, structural soundness & temperament by industry renowned accredited assessor Jim Green. Jim Has over 20 years' experience in doing this & this is all he does. He does it for many seed stock producers all over Australia. As can be expected he knows his stuff!! Each animal will have its structural & docility result stated in our sale catalogue. We feel this is one more way we can give our buyers more comfort & confidence in the animals we are selling.

Good structure in cattle has a direct effect on growth and

reproductive performance of a beef herd. Structural problems have detrimental effects on longevity, conception rates, calving timeframes and therefore directly impact on profitability.

Leg and feet issues, and temperament are highly heritable, therefore identifying animals with these issues allows you to improve your herd through assessment and selection.

At Ascot, independently assessing structure and temperament, measuring and collecting data, along with the use of performance recording gives us a better picture of how individual animals perform. This aids genetic selection and helps us breed animals with desirable traits.

SCORING DIAGRAM

1-9 Scoring System for feet and leg structure

- A score of 5 is ideal. (Note: Temperament score of 1 is ideal)
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals
- An animal scoring 4 or 6 would be acceptable in any breeding program
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing
- A score of 1 or 0 should not be catalogued and are considered immediate culls

Temperament

Temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet score '1'. Animals that are aggressive and extremely agitated in the crush score as '5'.

ASCOT'S COVID-19 PROTOCOLS

Covid-19 rules will be observed at Ascot. Our on-property sale will proceed following the latest Government guidelines. Health declarations along with pen & gloves will be given to all visitors upon entry. Wash stations and hand sanitiser will be made available throughout the complex. We ask that all visitors maintain a social distance of 1.5m from others, unless from the same family group.

All catering will be supplied as usual, following covid safe practice to ensure your health & safety whilst at our sale.

We recognise that the management of this pandemic is continually evolving. We will continue to monitor and implement recommendations and control measures as advised by the Government.

Welcome to the 2020 Ascot Bull Sale

Congratulations, you have chosen to purchase a bull destined to improve your herd's genetic profile and positively influence your profitability! Jim and

Jackie have put tremendous effort into ensuring their produce will produce the best possible product for you. Key to this has been managing reproductive risk.

Jim and Jackie asked me to assist them in ensuring that they do not sell a bull Persistently Infected (PI) with BVD. In order to protect your profitability and their reputation, all bulls sold at Ascot Cattle Company have been screened to ensure that none of them are PI.

BVD is arguably the most significant pathogen impacting beef and dairy production systems in Australia. Animals exposed to the virus may suffer reproductive losses, secondary complications from immune suppression, or both. To protect your production system's profitability, Jim and Jackie have ensured they won't pass a PI on to you by screening each bull sold today, and further they have vaccinated their sale bulls to protect them should they meet a PI in the future.

Not only has your new bull been vaccinated twice against exposure to BVD, but also twice against leptospirosis, vibrio, 3-day sickness, and botulism. Vaccinations are designed to limit the incidence and severity of infection should your bull come in contact with any of these diseases. We encourage you to continue to provide annual boosters by administering booster vaccines as appropriate for your area to your bulls approximately a month prior to mating each year.

Your bull should be able to easily handle a booking of 2.5-3% or 30 to 40 cows. Peak activity should occur in the first three weeks of the mating season, in which over half of the breeders joined may fall pregnant depending upon their condition, plane of nutrition, and how recently they have calved.

Most bull breakdowns occur in the first three weeks of mating due to the bull's busy initial caseload as well as the potential for exposure to novel diseases. Please ensure that each of your bulls is visualized at least 2-3 times per week for the first three weeks of the mating season and at least weekly thereafter.

Bulls can work well together in large groups, however, as the mating season progresses, the number of cycling females will decline, and bored bulls can start fighting. Restricting your mating to nine weeks can reduce bull aggression and ensures that a high proportion of cows are actually cycling when the bulls go in next season. Alternatively, reducing the bull load in the paddock as the season progresses may reduce bull wastage due to trauma.

Even when bulls have been optimally prepared prior to mating, single sire mating may remain a risky proposition. If single sire mating, a good insurance policy is to switch appropriate bulls half-way through the joining period.

Early pregnancy testing pays dividends. Identifying empty females as early as possible to salvage precious feed has obvious advantages. In addition, pregnancy testing early improves the probability of diagnosing the root cause of poor reproductive outcomes. If the bulls play a role, knowing which bulls were used in each mob is critical.

Good luck with your new bull from all of the team at Ascot Cattle Company and from us at Swans Veterinary Services! I work with veterinarians from all over Australia to structure herd level eradication programs to systematically manage BVD. If you would like help designing your own BVD management program feel free to ring me at 0427 716 907 or email me at enoch@swansvet.com

Happy Mating!

Enoch Bergman DVM

Sire of Lots: 11,40 & 44. Dusty continues to be the benchmark for high performance Angus, who excels across the board in all traits. This bull has maintained his ranking as the #3 PROVEN Angus sire for Australian Breeding Index. His calving ease, high growth, moderate mature cow weights and massive carcass, continue to make Dusty one of the most unique Angus sires in the world.

Top 5% 200D,400D,600D & carcass wts.Top 10% Feed efficiency,Retail beef yield,ABI,Heavy Grain & Grass Indexes.Top 15% Eye muscle.Top 20% Domestic Index Semen retained. This is a bull we like a lot with good pedigree again. His Millah Murrah dam has one of the best calves every year & his sire is producing some really industry focused progeny for both us & Clunie Range stud. A real performance sire with very top end growth,high EMA & good IMF. He balances all this with very high net feed efficiency.Huge weight for age yet he carries it so easily & moves so freely. Great skin type , extra length, great docility & near perfect structural scores make him a top end commercial bull or stud sire prospect.

Top 5% Domestic index & Shorter days to calving. Top 10% Eye muscle, ABI & Heavy grass index. Top 15% Heavy grain index. Top 25% Rib fat, IMF, 200D, 400D wts & Calving ease dtrs. Top 30% Milk & Rump fat A new generation sire here. First of the Clunes Crossing Dusty M13 bulls we have sold & one of the first in Australia. Dusty is ranked No. 3 in the breed for Angus breeding index. His calving ease, high growth, moderate mature cow weight and massive carcass make Dusty one of the unique Angus sires in the world. This lot 11 bull has a fantastic EBV spread with good calving ease, moderate birth, good growth, low mature cow weight, good EMA, positive fats & high IMF. Clean coated, with good scrotal, great structure & good pedigree, he is a real performance bull. **WA ELIGIBLE**

Top 10% Rump fat. Top 20% Rib fat. Top 25% Scrotal size & Shorter days to calving

First of the Texas Global sons in the sale & first of the next management group. A very thick, yet smooth muscled, slick coated bull here we think a lot of. Great balance of EBVs including calving ease, low birth weight, above breed average growth, good scrotal, positive fats & good IMF. His lower birth weight EBVs & calving ease means he should SUIT HEIFERS OR COWS. This combined with his excellent structural scores means he is very versatile & one of the standout commercial bulls in the sale.

Top 15% Lighter birth wt. Top 20% Milk & Carcase wt. Top 25% Calving ease dtrs

A stand out young bull here with extra muscle & fleshing. One of the heavier bulls in the sale yet in a moderate frame size. A nice even balance of EBVs across the board including low birth weight & high calving ease meaning he should SUIT HEIFERS OR COWS. Very cleaned skinned bull with excellent structure. One of the better bulls here.

Top 5% 600D wt & Feed efficiency. Top 10% 200D & 400D wts & Retail beef yield. Top 15% Carcase wt. Top 20% Heavy grass index & Shorter gestation length First of the Nampara Liberty bulls in the sale. We purchased Liberty for \$85,000 in partnership with Keringa Angus S.A. His sons have been very popular in our last 2 sales for good reason. He breeds great carcasses on his progeny & wonderful females. This bull is a good example with high growth, high carcase weight & high feed efficiency EBVs. Great for the grass fed & cross breeding programs. Good structural scores. Good bull.

Powerful, yet soft & thick with strong polled head. Very good structurally with great balance of EBVs including top of the breed growth, carcase weight, positive fats & high IMF. He is clean skinned & deep flanked with large scrotal. Once again would not be out of place in a STUD herd or top commercial bull. A bull with what I always talked about "the Ascot Balance" - good phenotype combined with great carcase trait EBVs & polled. **WA ELIGIBLE**

Top 2% IMF, Scrotal size & Shorter gestation length. Top 10% Rump fat, 200D & 400D wts, Lighter birth wt & All indexes. Top 20% Rib fat, Milk, 600D & Carcase wts A real stand out bull here by the great Ascot Juggernaut sire, who's sons have topped many of our sales with top prices up to \$26,000. This bull is nearly perfect in every respect with thickness right through, deep flanked, great hind quarter muscling with meat right down to his hocks, as you will see in the attached graph his carcass trait Profit drivers are nearly perfect from lower birth weight, high growth, large scrotal, high fats & very high IMF. To top it off he is **HOMOZYGOUS POLLED** & very quiet. This bull is a prime example of where the Ascot program has been heading for the last 10 years. As you will notice as you go through the catalogue many of the bulls have these key profit driver traits in the near top of the breed including birth weight, gestation length, growth, scrotal, carcass weight, fats & IMF. This bull has the real Ascot Balance: Phenotype, weight for age & Carcase traits at the top of the breed & homo polled. **Semen Retained** for in herd use only. This bull has **STUD SIRE POTENTIAL. WA ELIGIBLE**

These good bulls keep coming. First son of the new sire Ascot Masterpiece ,out of arguably our best cow. Good thickness in this bull in a moderate frame. Talk about near perfect carcase data - look at this bulls. Low birth to top end growth,good milk,scrotal,EMA, very positive fats & high IMF. Just can't find this normally.Good structural scores & scrotal & quiet. HIS EBVs suggest he should suit HEIFERS OR COWS making him very useable. Improve your MSA grading with this bull. **WA ELIGIBLE**

 We really like this Kilo Packer son. Moderate framed but thick, deep & soft. Smooth shouldered with good muscling & polled sires head. Good data with low birth, very high growth for all weight categories, good carcass weight, good scrotal & good EMA. Versatile in that EBVs suggest he should SUIT COWS OR HEIFERS. **HOMOZYGOUS POLLED** & docile. Good bull. **WA ELIGIBLE**

Moderate framed, nicely put together younger bull here. By the same sire as lots 65 & 70, Palgrove Lustre. He is a well muscled, very docile bull with excellent carcass data including moderate birth weight, good growth, very positive fats & very high IMF EBVs. You will improve your MSA grading with this bull. Good structural scores.

We used this bull over heifers as a yearling. That's why he is slightly behind in condition than some of his contemporaries. He was a real standout yearling & still impresses now. Very slick skinned bull with good length & ideal bone. Very good balance of carcase data including low birth weight, good early growth, high milk, good EMA & very high fats & IMF. Structurally good a VERY VERSATILE BULL that should SUIT COWS OR HEIFERS. **HOMOZYGOUS POLLED.**

Top 20% 600D wt & Calving ease.Top 30% 400D wt This Lump Sum son is a bull I like a lot. He will be a fantastic sire when he matures I feel. Good, loose, clean skin type even at his age. Sires polled head & outlook. Near perfect data set from lower birth weight,good growth & carcase weight,high milk, very positive fats & good IMF. He is very versatile in that his EBVs suggest he should SUIT COWS OR HEIFERS. The real Ascot balance as he is also **HOMOZYGOUS POLLED** & quiet. Think what he will be like as a 2 year old! **WA ELIGIBLE**

Top 1% Milk.Top 20% 600D wt,Rib & Rump fats.Top 25% Carcase wt & Lighter birth wt This Lump Sum son is the youngest bull in the brot but don't overlook him. He is a natural FULL BROTHER to our top priced bull at our Autumn sale selling for \$28,000 to Chelbrook Charolais,Goovigen. You need to overlook his age to what he will mature into. Good muscle & structure in this young bull. A nice balance of EBVs from lower birth weight, above average growth & carcase weight, very high milk, & positive fats. On top of this he is **HOMOZYGOUS POLLED** . A bull not to miss. **WA ELIGIBLE**

This bull has a lot going for him : One of the first bulls I have seen anywhere to get a 100% perfect structural score. His EBVs are where you want them: top of the breed growth & carcass weight, large scrotal,above average EMA & fats. Great industry bull that should improve your herds profitability no matter what you put him over. Very docile as a bonus. Dont overlook these good young bulls because their coats havent cleaned up & matured yet. **WA ELIGIBLE**

HOW TO GET THERE

ASCOT

Coming from Toowoomba

- From the New England Hwy at Allora, turn right into Allora Dve.
- Stay on this road through Allora continuing south towards Warwick for 15 km.
- North Toolburra is on your right

Navigating by GPS

- If navigating by GPS:
Enter 1123 Warwick-Allora Road,
Massie

Coming from Stanthorpe

- Coming in to Warwick on the New England Hwy, go straight ahead at the 1st set of lights (at Wood St.).
- Continue straight ahead along Rosehill Rd, past the Racecourse, and past John Dee Meatworks.
- Follow this back road to Allora for 9km past the meatworks.
- North Toolburra is on your left.

QUEENSLAND LIVESTOCK AGENTS ASSOCIATION LIMITED

STANDARD STUD STOCK - AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE: All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

1. The highest bidder shall, subject to Conditions 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
 3. The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
 4. The auctioneer expressly reserves the right, without giving any reason therefore to:-
 - (a) Refuse to acknowledge any bid;
 - (b) Withdraw any lot or lots before or during the sale;
 - (c) Exclude any person from the auction venue should it think fit.
 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
 7. In the event of any dispute in respect to the sale of any lot:-
 - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
 - (ii) The vendor and the purchaser shall resolve the dispute between themselves;
 - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
 - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing.
 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
 9. (a) PAYMENT - Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidders' offer by the vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:-
 - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
 - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill Rate and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Banker's Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser for the interest rate to apply for the purpose of this condition.
 - (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
 10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
 11. Any vendor or purchaser removing the Sale Number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
 12. The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
 13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
 14. The auctioneer may, should it think fit, make arrangements on a purchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
 15. No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
 16. (a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby executed. The auctioneer is not liable in respect of any error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
 - (b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to remain with the vendor.
 17. In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.
 18. (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
 - (b) If any vendor brings to the premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
 19. DELIVERY. Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
 20. In these Conditions:-
 - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
 - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
 - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
 - (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.
- IMPORTANT NOTICE The Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.
- All persons who attend the sale do so entirely at their risk and the Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
