

ASCOT BULL & HEIFER SALE

FRIDAY 16TH SEPTEMBER 2022

Lot 1

Lot 92

ASCOT
CHAROLAIS & ANGUS

**130 POLLED BULLS
42 HEIFERS**

ON-PROPERTY 'NORTH TOOLBURRA' WARWICK QLD

Welcome to the Ascot Spring bull sale. Firstly thank you again to all our previous buyers, underbidders & supporters of our program.

We are very excited & passionate to be involved in such a great industry & great people.

The unsolicited feedback we are receiving about our bulls' performance from both our angus & Charolais programs adds to our passion & makes it all worthwhile for us.

We meticulously select sires individually for every female in the herd for the best result for maternal & MSA targeted carcass traits to achieve the most efficient bulls for our clients & females for our retention. From our feedback this appears to be working.

Also our first foray into carcass competitions resulted in wins for carcass quality which helps to reinforce that our MSA breeding focus for both breeds is working.

The sale will be a live auction & also interfaced with AUCTIONS PLUS with LIVE VIDEO & AUDIO. As well as photos there will be a video of every bull & heifer on our website & Auctions Plus site to make remote bidding easier.

PHONE BIDDING WILL ALSO BE AVAILABLE & 4% COMMISSION PAYABLE TO OUTSIDE AGENTS.

ANGUS SALE BULLS

73 Angus bulls: 43 x 2 year olds, 24 x 16 to 18 month old bulls & 6 x 12 month old bulls.

Some of the sire lines represented include: 17 sons of the 160,000 Millah Murrah Paratrooper, First sons by Ben Nevis Premise, Exclusive, Ascot Premier, Capitalist, Ascot Mogul (Full brother to Hallmark), MM Loch Up, first sons of Booragul Leading Edge P81 (their top price bull in 2020) & Sprys General to name a few. ALSO WE ARE EXCITED TO OFFER 6 OF OUR FIRST SONS SOLD IN OUR NEW SIRE DUNOON PRIME MINISTER (highest priced angus bull sold in Australia in 2020 at \$140,000). PRIME MINISTER will be ON DISPLAY at our sale. There will also be heifers by him in sale.

Potential heifer bulls will be identified in this catalogue.

CHAROLAIS SALE BULLS

The 57 polled Charolais bulls consist of 35 x 2 year olds & 22 x 16 to 18 month old bulls. (33 bulls are homozygous polled)

Some of the sire lines represented include: New Sires: Silverstream Manhattan, Turnbolls Duty Free, Rosedale Quantum Leap, Ascot Kingtide N76 & Ascot Patriot. Tried & Proven breed leading sires: Rosedale Lump Sum (sire of our record priced top seller last year at \$47K), Rosedale Nagel (sire of our second top price bull at \$45K), Ascot Nett Profit, Paringa Kilo Packer, Ascot Kingmaker & the \$160K LT Authority to name a few. Potential heifer bulls will be identified in this catalogue.

SALE HEIFERS

We are proud to offer 42 Purebred, registered & Breedplan recorded unjoined all polled stud heifers from the heart of the herd. 19 Angus heifers & 23 polled Charolais (16 homozygous polled) heifers.

Breed leading sires represented are similar to those mentioned in bull details above. A number of the angus are by MM Paratrooper & the exciting new sire Dunoon Prime Minister. With the Charolais some are by new sires Silverstream Manhattan & Moongool Pilgrim. All heifers have been independently assessed. Photos & videos of each heifer will be on website closer to sale.

Ascot Quality Assurance

Our understanding with the new Johnes regulations, as JBAs 7, that all our cattle are eligible to go anywhere in Australia, including to WA.

All bulls are:

- Independently assessed for structure & temperament by industry expert Jim Green.
- Vet, semen & MORPHOLOGY tested by Ced Wise Vets & a bull breeding soundness certificate issued with every bull.
- Blooded for tick fever.
- Vaccinated for 3 day sickness, 7 in 1, pestivirus, botulism & vibrio.
- Ascot is a tested pesti free herd.
- All bulls scanned for fats, EMA, IMF & scrotal size as yearlings & fully Breedplan recorded.
- DNA sire or parent verified.
- Scanned again prior to sale for fats, EMA, IMF & scrotal size for supplementary sheet.

FREE DEIVERY TO MANY MAJOR CENTRES IN QLD & NSW. REFER CATALOGUE FOR DETAILS.

Supplementary sheets will be available approx. 1 week before the sale.

Complimentary morning tea, lunch & after sale refreshments will be provided on sale day.

We look forward to catching up with everyone on sale day with inspections from 10AM with sale starting at 1PM, Qld time Friday 16 the September.

PRESALE INSPECTIONS ARE AVAILBLE ANYTIME BY APPOINTMENT.

Yours Sincerely,

Jim & Jackie Wedge.

4% Commission to outside Agents

SALE INFORMATION

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 1pm on Friday 16th September 2022.

Bulls may be inspected from 10.00am on the morning of the sale, or at any other time by arrangement with the agents or vendor.

SELLING SYSTEM:

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

REBATE:

4% Rebate to outside agents registering Bull buyers, in writing, PRIOR to the sale, and settling on their behalf within 14 days of the date of invoice.

PHONE BIDDING:

We have full mobile phone coverage at the sale. If you intend purchasing over the phone, please contact the selling agents to reserve a line.

GST:

All animals are sold exclusive of GST.

INSURANCE:

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for their first six months of working life. There are a number of options available through Elders Insurance at the sale venue.

While all care and attention will be taken liability of bulls falls to the purchaser at fall of hammer.

AUCTION PLUS

This year we will have live video and audio streaming all done through Auctions Plus. Please register 24hrs before the sale.

REGISTRATION:

Ownership transfer of bulls will be registered by the vendors with Angus Australia or Charolais Australia provided accurate transferee details are supplied with the Buyers Instruction form.

CATERING:

Please join us for complimentary morning tea, lunch and after sale drinks.

PHYSICAL EXAMINATION OF BULLS

All bulls and heifers offered for sale have been structurally assessed by Jim Green and vet checked. A veterinary bull breeding soundness evaluation certificate will be issued before sale date and animals only sold if deemed satisfactory for the following inspections:

- Palpation of internal genitalia
- Palpation of Scrotal Contents
- All bulls undergo crush-side and morphology testing.
- Physical examination of feet, legs, gait, head and joints.
- Structural soundness evaluation & temperament score.

TEMPERAMENT

The bulls have been handled with horses, ATV utilities and on foot. We know their temperament individually and are confident that under normal circumstances each animal in the sale is of sound temperament. Understandably each year on sale day an occasional bull misbehaves due to the big change to the yard area and the pressures of strange people invading their space.

HEALTH QA:

The bulls are ready for immediate use.

We have treated them as follows:

- Pesti tested Negative
- Double vaccinated them with Vibrovax
- Vaccinated for Tick Fever
- Double Vaccinated with 7 in 1 & Pestigard
- Double Vaccinated for 3 Day
- Drench with Cydectin Pour On prior to sale
- Botulism

JOHNES STATUS & WA ELIGIBILITY:

Bulls eligible to enter WA.

Ascot Warwick Qld property - JBas 7 (QLD, tested annually)

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

FEEDING REGIME & MANAGEMENT.

The life cycle of our bulls consists of running on crop or pasture all of their lives until just prior to sale time when they receive a high hay base ration. This ration contains a nutritionist formulated supplement with added vitamins, minerals and antioxidants for foot, fertility and general health. The high roughage ration also

includes chopped hay, straw and rolled barley at very low percentages. This ration also helps adjust the rumen to help them cope with whatever pasture conditions they encounter at their new homes.

DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure the accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

WARRANTY

THE VENDOR WARRANTS THAT:

1. Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser ("Warranty Period"); and

THE VENDOR WILL EITHER:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Ascot Cattle Co Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value:

WHERE:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

THE PURCHASER ACKNOWLEDGES THAT:

The purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the Seller are excluded.

The Seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risk associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert of bulls fighting and if one is playful with you, do not respond by patting his head.

What a bull considers a playful nudge can break human legs! We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

DELIVERY

Agents Elders, Landmark and Colin Say & Co will be handling the organisation of delivery of Sale Cattle. Free freight is offered to Emerald, Rockhampton, Goondiwindi, Roma, Toogoolawah, Injune, Glen Innes, Tenterfield, Inverell, Moree, Narrabri, Tamworth, Dubbo, Gunnedah & Casino.

Responsibility goes to purchaser at fall of hammer. We recommend insuring all bulls.

SEMEN RIGHTS

Ascot retains the right to collect up to 200 straws of semen from any bull in the sale for use within the Ascot herd. Any semen collection would be at Ascot's expense & the purchaser's convenience.

ACCURACY OF CATALOGUE

While every care and attention to details in catalogue has been made we cannot guarantee that some mistakes have occurred during printing or construction of catalogue.

POLL TESTING

Ascot Charolais bulls have been tested by Neogen Laboratory with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100% correct. We rely on the university to determine an animals status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test deemed to be incorrect.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

1. MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting'; is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level.

Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting.

Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament, and when available, selecting animals with superior Docility EBVs. Docility EBVs are estimates of genetic differences in the percentage of an animal's progeny that will be scored with acceptable temperament, with higher EBVs associated with superior temperament. For example, an animal with an EBV of +20% would be expected to on average produce a greater percentage of progeny that have acceptable temperament than a bull with an EBV of -2%.

Research has also demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency.

Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +4.4 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of + 1.0 mm, relative to carcass weight.

2. RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs.

A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance.

In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal.

Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +0.4 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.6 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal.

Selection of animals with acceptable temperament, higher Docility EBVs, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd.

To further discuss breeding for MSA programs, please contact staff at SBTS and TBTS. More information about Meat Standards Australia is also available from the MLA website

www.mla.com.au

WHO'S YOUR DADDY?

WHY SIRE VERIFY?

At Ascot we Sire Verify all our sale bulls to ensure that the bull you are investing in is as portrayed in the catalogue. Why is this important?

You are making an investment in genetics. These genetics, or pedigree of the animal you are buying, need to be independently verified as correct, not what we think it is.

FIT FOR PURPOSE:

An example - You are looking for a bull with certain EBV's for calving ease and low birthweight - if the bull you purchase was by a different sire to what was thought, then these values would be incorrect. He may have poor calving ease & high birthweight - not desirable if you were needing a bull to join with heifers for instance.

Another scenario - You have chosen to invest in a bull with particular traits - fat, muscle or marbling for example to influence your herd. If the bull you have selected is not sire verified, then there may be a possibility of it having different carcass trait values altogether.

EBV's are influenced by historical data from the animal's pedigree, so an incorrect pedigree means incorrect EBV's. This then is an issue as the bull you have purchased is not fit for the purpose you intended.

At Ascot we strive to give as much accurate information as we can. As well as all measurements collected and submitted to the breed society, we submit DNA to identify pedigree, and also the homozygous polled gene in our Charolais herd, to give you as much information as we can to help you in making your purchase.

Parts of this article provided with the permission of AA

HOMOZYGOUS POLLED

All animals stated as Homozygous polled in this catalogue have been tested with the SEQ_POLL Prediction test at Neogen Laboratory prior to sale, and are PcPc or PcPf Homozygous.

HOMOZYGOUS POLLED EXPLAINED

Recently, candidate mutations associated with polled phenotype in European breeds of cattle were found. There are two independent origins of polled, one found in Holstein-Friesian and Jersey breeds (Pf), the other in many European breeds of Celtic origin (Pc) such as Angus, Blonde d'Aquitaine, Dexter, Limousin, Charolais and Hereford, among others. Polledness is dominant; a polled animal can have one or two copies of the gene. All offspring of a bull with two copies of polled (homozygous) will be polled. Genetic testing is a cost effective means to determine if a polled animal has 1 or 2 copies of the gene.

Pc/Pc Polled. Two copies of the Polled-Celtic molecular marker are present. All offspring will be polled.

Pc/Pf Polled. One copy of the Polled-Celtic and one copy of the Polled-Friesian molecular markers are present. All offspring will be polled.

Reference:

Medugorac I, D Seichter, A Graf et al. Bovine Polledness - An autosomal dominant trait with allelic heterogeneity. PLoS One 7(6): e39477, 2012. (as supplied by AGL, UQ, Gatton, Q.)

Poll testing: Ascot Charolais bulls have been tested by the Neogen Laboratory with the SEQ_POLL Prediction test to identify their poll status. While this is the most accurate poll test available to determine if an animal is PP (homozygous polled) there is no guarantee by Ascot that this is 100% accurate. We rely on The University to determine an animal's status. Therefore Ascot cannot bear direct liability or any consequential losses incurred by the purchaser should this test be deemed to be incorrect.

STRUCTURAL ASSESSMENT AT ASCOT

Jim Green – 0402 003 137

At Ascot we are 'Raising the Bar'

All sale bulls & PTIC females will be independently assessed for feet, structural soundness & temperament by industry renowned accredited assessor Jim Green. Jim Has over 20 years' experience in doing this & this is all he does. He does it for many seed stock producers all over Australia. As can be expected he knows his stuff!! Each animal will have its structural & docility result stated in our sale catalogue. We feel this is one more way we can give our buyers more comfort & confidence in the animals we are selling.

Good structure in cattle has a direct effect on growth and

reproductive performance of a beef herd. Structural problems have detrimental effects on longevity, conception rates, calving timeframes and therefore directly impact on profitability.

Leg and feet issues, and temperament are highly heritable, therefore identifying animals with these issues allows you to improve your herd through assessment and selection.

At Ascot, independently assessing structure and temperament, measuring and collecting data, along with the use of performance recording gives us a better picture of how individual animals perform. This aids genetic selection and helps us breed animals with desirable traits.

SCORING DIAGRAM

1-9 Scoring System for feet and leg structure

- A score of 5 is ideal. (Note: Temperament score of 1 is ideal)
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals
- An animal scoring 4 or 6 would be acceptable in any breeding program
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing
- A score of 1 or 0 should not be catalogued and are considered immediate culls

Temperament

Temperament or docility score separates animals from the same contemporary on their calmness in a confined area. Animals which are extremely quiet score '1'. Animals that are aggressive and extremely agitated in the crush score as '5'.

ASCOT'S COVID-19 PROTOCOLS

Covid-19 rules will be observed at Ascot. Our on-property sale will proceed following the latest Government guidelines. Wash stations and hand sanitiser will be made available throughout the complex. We ask that all visitors maintain a social distance of 1.5m from others, unless from the same family group.

All catering will be supplied as usual, following covid safe practice to ensure your health & safety whilst at our sale.

We recognise that the management of this pandemic is continually evolving. We will continue to monitor and implement recommendations and control measures as advised by the Government.

Welcome to the 2022 Ascot Bull Sale

Congratulations, you have chosen to purchase a bull destined to improve your herd's genetic profile and positively influence your profitability! Jim and Jackie

have put tremendous effort into ensuring their produce will produce the best possible product for you. Key to this has been managing reproductive risk.

Jim and Jackie asked me to assist them in ensuring that they do not sell an animal Persistently Infected (PI) with BVD. In order to protect your profitability and their reputation, all bulls & heifers sold at Ascot Cattle Company have been screened to ensure that none of them are PI.

BVD is arguably the most significant pathogen impacting beef and dairy production systems in Australia. Animals exposed to the virus may suffer reproductive losses, secondary complications from immune suppression, or both. To protect your production system's profitability, Jim and Jackie have ensured they won't pass a PI on to you by screening each animal sold today, and further they have vaccinated their sale animals to protect them should they meet a PI in the future.

Not only has your new bull been vaccinated twice against exposure to BVD, but also twice against leptospirosis, vibrio, 3-day sickness, and botulism. Vaccinations are designed to limit the incidence and severity of infection should your bulls or heifers come in contact with any of these diseases. We encourage you to continue to provide annual boosters by administering booster vaccines as appropriate for your area to your bulls approximately a month prior to mating each year.

Your bull should be able to easily handle a booking of 2.5-3% or 30 to 40 cows. Peak activity should occur in the first three weeks of the mating season, in which over half of the breeders joined may fall pregnant depending upon their condition, plane of nutrition, and how recently they have calved.

Most bull breakdowns occur in the first three weeks of mating due to the bull's busy initial caseload as well as the potential for exposure to novel diseases. Please ensure that each of your bulls is visualized at least 2-3 times per week for the first three weeks of the mating season and at least weekly thereafter.

Bulls can work well together in large groups, however, as the mating season progresses, the number of cycling females will decline, and bored bulls can start fighting. Restricting your mating to nine weeks can reduce bull aggression and ensures that a high proportion of cows are actually cycling when the bulls go in next season. Alternatively, reducing the bull load in the paddock as the season progresses may reduce bull wastage due to trauma.

Even when bulls have been optimally prepared prior to mating, single sire mating may remain a risky proposition. If single sire mating, a good insurance policy is to switch appropriate bulls half-way through the joining period.

Early pregnancy testing pays dividends. Identifying empty females as early as possible to salvage precious feed has obvious advantages. In addition, pregnancy testing early improves the probability of diagnosing the root cause of poor reproductive outcomes. If the bulls play a role, knowing which bulls were used in each mob is critical.

Good luck with your new purchase from all of the team at Ascot Cattle Company and from us at Swans Veterinary Services! I work with veterinarians from all over Australia to structure herd level eradication programs to systematically manage BVD. If you would like help designing your own BVD management program feel free to ring me at 0427 716 907 or email me at enoch@swansvet.com

Happy Mating!

Enoch Bergman DVM

TESTIMONIALS

Warriors herd fertility boost

By Matt Sherrington

The fertility of the crossbred herd Queensland's Wade Warrian is focussed on producing has been markedly enhanced since he introduced Angus bulls.

With support from his fiancée Ashleigh and their 11 month-old daughter Madeline, Mr Warrian runs his breeding program on Myrtlevale, Injune, and Wilga Park, north east of Roma.

Mr Warrian said they'd been running more of a Brangus herd prior to sourcing Angus bulls from Jim and Jackie Wedge's Ascot stud five years ago.

"Through the drought in 2019 we'd been having fertility issues, but since utilising the Angus bulls our heifers are going in calf much younger and going back in calf a lot easier," he said.

"The Ascot bulls have also bolstered the bone, length and depth of the progeny we're producing.

"We're aiming for a three quarter Angus one quarter Brahman article. We'll always keep Brahman genetics in the herd for drought proofing purposes and to keep the shiny coat on the progeny."

The bulls are put in the paddock in the first week of November. A couple of these bulls stay in to pick up whatever cycles are missed.

"We sell weaner steers through the Roma Saleyards, off their mothers at 300kg, so it doesn't worry us if we have different lines of weaners going there through the year."

The predominantly brigalow scrub country on the properties has received "unreal rain" since late in 2021.

"We received nearly 560mm in November, though it has since dried off a bit. The grass started coming through in December/January and hasn't stopped. We have some excellent herbage coming through, which has helped to kick the cattle along.

Good times: Wade Warrian with his fiancée Ashleigh Cleal and their daughter Madeline, on Myrtlevale, Injune, Queensland, with a selection of their Angus-cross herd.

"Now that we have better conditions we'll be getting stricter with culling again over the next 12 months. We've continued to preg-test and remove empties through the dry, but we've been easier on them while trying to get our numbers back up. Our fertility rate is in the high 80 to early 90 per cent range."

"We're looking at increasing our breeder numbers by 200 in the next three to four years. We'll then be taking over more country, which means we'll need to substantially increase our numbers again at that point."

Mr Warrian said dealing with the Wedges has been an "unbelievable" experience.

"All of their cattle are so quiet and easy to manage, and the Wedges are a pleasure to deal with."

He said they currently have 10 Ascot bulls in the paddock.

"The best Australian bloodlines are in all the bulls Ascot produces. The Wedges have really done their homework. We've never had an issue with one of their bulls. We'll be looking to buy more Ascot bulls at the Wedges sale this year."

Quiet nature vital for Manumbar operation

By Jeanette Severs

CLINT Gollan feels confident in the quietness of his cattle to include his children in mustering duties.

"There's nothing better than seeing the kids go out with their dogs to bring in the cattle," he said.

Ellie (10), Will (8) and Hattie (6) are dab hands at mustering on horseback alongside their parents, Clint and Emmily.

Clint and Emmily Gollan, in a partnership with Brett Pointon, manage three properties in Queensland where they breed, finish and trade Brahman-Charolais cattle.

As Pointon Pastoral Company, based at Manumbar, they have purchased around 30 Charolais bulls over the past decade from Ascot Angus and Charolais stud, on the Darling Downs, to join to Brahman breeders that run on country in the South Burnett.

In particular, Mr Gollan prefers the homozygous 100 per cent polled Charolais bulls bred by Jim Wedge.

"They've made a dramatic difference to our progeny and to the wellbeing of calves at branding and weaning time," Mr Gollan said.

"Jim Wedge is probably the leader on homozygous breeding. His genetics have eliminated the need for us to dehorn cattle."

The capacity of the Ascot Charolais bulls to stand up and perform in tick country also impresses Mr Gollan.

"The Ascot Charolais bulls handle the ticks. All the bulls we buy have been blooded, to build their tick resistance.

"We buy cattle off the Downs and they go through the coastal country, and they're handling coming into the tick zone."

Pointon Pastoral Company purchases Brahman heifers and cows from northern Australia, joining 1200 cows in a ratio of one bull to 30 cows at Gobongo. The herd grazes on improved pastures at Gobongo.

"I source cows and heifers from about 10 breeders. I like to go and look at the cattle and put a good line of breeders together.

"It's important they genetically have low birthweights, are hardy and durable, and are quiet to handle.

"I just try to source good cows that complement the Charolais bulls - well handled, quiet, with a good temperament in the yards and in the paddock."

Mr Gollan supplementary feeds the bulls prior to joining. They are also semen and morphology tested.

Bulls go in with the cows and heifers in October, and are out by February.

EVEN: Charolais-Brahman weaners from the Pointon Pastoral Company in the stockyards at Gobongo.

"We always supplement the bulls a little bit so they have extra energy and work hard in the first month they go out with the cows, which means a tight calving pattern for most of the cows," Mr Gollan said.

He chooses low birthweight bulls for the heifers, and his decision is justified.

"Of 1200 cows and 200 heifers, we don't have any calving problems. Since using the low birthweight Charolais bulls for the heifers, I've only had to pull one calf."

Weaning begins in March.

The calves are taken off their mothers and transported to Riversleigh at Surat, where they're yard-weaned on sorghum hay and dipped for ticks twice over that period. Once weaning is complete, the full complement of steer and

heifer calves go onto pasture through April and May, on improved pastures that are a blend of panic, blue and Rhodes grass. The pastures are broadcast oversown by plane.

Then they graze on 809 hectares (2000 acres) of forage oats until being sold to a feedlot buyer.

"Once the oats are gone, the majority of the steers and heifers are gone," Mr Gollan said.

Mr and Mrs Gollan also trade cattle, buying in cross-bred steers - depending on the season, they can graze an extra 800 steers at Riversleigh.

"We buy about 800 steers out of the saleyards and find Charbrays work best for us," he said.

"We breed as many Charbrays as we can and top up with trade steers."

CLIENT SUCCESSES

2022 Dalby Feeder & Weaner sale

Long time buyers of Ascot Charolais & Angus Bulls - Samuel Holdings, Manumbar Q took out a few ribbons at the 2022 Dalby Feeder & Weaner sale.

They sold steers sold to \$6.78 & Heifers to \$6.30. At a recent Gympie sale Steers sold to \$7.00.

Champion Pen of 6 Steers at the Royal Qld Show

A very special day for one of our loyal buyers - Maree Duncombe, Conondale, Q.

She was at the Ekka judging to watch her weaners that were sold last year to Leith & Katie Nash of Stanhope Cattle Co who did a great job on them, taking out the Ribbon for Champion Pen of 6 Steers.

Maree only uses Ascot Polled Charolais bulls over her beautiful Brahman females to produce sale – topping weaners annually.

Top 2% 600D wt. Top 5% 200D wt. Top 10% Carcase wt, Scrotal size, Feet soundness & \$A-L Index. Top 15% Calving ease. Top 20% Feed efficiency. A bull we USED IN THE STUD as a yearling that we think a lot of. He stood out since a calf & had one of the best scans for IMF & EMA as a yearling. A quiet bull with excellent structure, tremendous spring of rib, good bone, large scrotal, tidy sheath, good skin & hair, strong sires head & outlook. Top end growth in top 2% of breed & carcase weight in top 10%, combined with lower birth weight make this bull a good all round prospect for top end commercial or stud use.

Top 2% Feet soundness. Top 5% Feed efficiency. Above Breed average 200D & 600D wts. A typical Millah Murrah Loch Up son here with extra bone, thickness & capacity out of a powerful banquet cow. Very good structurally he would suit cross-breeding over pretty well any breed or over straight angus cows.

Top 2% Feet soundness & Shorter days to calving. Top 5% Rib fat, 200D, 400D & 600D wts. Top 10% Carcase wt & Rump fat. Top 20% Scrotal & Shorter gestation length. A bull we really like here by Ascot Mogul. A full brother to Ascot Hallmark - who has been used all over Australia & NZ. Mogul is producing progeny very similar to Hallmark. This bull is a powerful bull being one of the heaviest in the sale & doing it easily. He has a strong sires head, extra thickness & depth, structurally nearly impossible to fault with a good temperament. He has a good skin & hair type, large scrotal & a tidy sheath. A bull in top 5% of breed for all growth weights & highly positive fats - he is MSA focussed like most of our bulls & will make a top end commercial bull or STUD potential that would suit the grass fed market well. Suitable for crossbreeding or straight angus cows. He will really put some weight for age in his progeny. ONE OF OUR PICK LOTS.

Top 1% Calving ease & Shorter gestation length. Top 5% Lower Birth wt, Milk, Shorter days to calving, Scrotal size, Claw set, Rib & Rump fats. Top 10% \$A-L Index. Top 15% \$A Index. Top 25% IMF. STAR LOT. First of the \$160K Millah Murrah Paratrooper sons in this sale. Another bull that stood out since a calf & still does. We USED HIM HEAVILY IN THE STUD as a yearling so he has had to catch up on condition with his contemporaries which he is doing well. To be used in our stud herd, bulls have to measure up on all facets. Structurally excellent & very docile with good sires outlook, beautiful skin & hair - he has a lot to like. He has extreme thickness right through & very square topped. His MSA targetted data & carcase attributes were also one of the reasons we used him in the stud with lower birthweight, very high calving ease, above average 400, 600 day growth very high milk, scrotal, EMA, high positive fats, & high IMF. DATA SUGGESTS HE SHOULD SUIT HEIFERS OR COWS. He has STUD POTENTIAL or top end commercial use. One of Ben Simpson's picks during filming. Dont overlook this good bull.

Top 3% 400D wt, Rump fat & \$A-L Index. Top 5% 200D wts, Shorter gestation length & days to calving, \$A Index. Top 7% 600D & Carcase wts. Top 25% Scrotal size & Calving ease Dtrs. Top 30% Rib fat. Yet another of these consistent Paratrooper sons, this fellow ouzes quality with great skin & hair type, smooth muscle pattern, excellent structural scores with good sheath & very quiet. His MSA focussed carcase data is balanced across the board with moderate birth, top end growth & carcase weight, very positive fats & above average IMF. He is bred in the purple by Millah Murrah Paratrooper out of a Hallmark daughter who is by one of our Millah Murrah donor cows. He was also one of Ben Simpson's favourites during filming & for good reason. Bear in mind he is a younger bull in this contemporary group. He will really lift your profitability by increasing weight for age & carcase gradings. Suit **STUD DUTIES** or top end commercial use.

Top 10% 200D & 600D wts, Milk & Calving ease. Top 15% 400D wt, Lower Birth wt, Feed efficiency, Retail beef yield. Top 20% \$A Index. Top 25% \$A-L Index & Carcase wt. A really strong upstanding sire here that catches your eye. Extremely thick right through with strong sires head & outlook, good sheath & good strength of spine. With top end growth EBVs he will put good weight for age into his calves & would be good for cross-breeding over bos indicus based cattle or straight angus. His lower birth weight & high calving ease data means he should be suitable over HEIFERS OR COWS. Good bull.

Top 3% 200D,400D,600D & Carcase wts.Top 5% shorter gestation length.Top 10% \$A-L Index. Top 20\$ \$A Index. At 19 months at sale time this fellow is the first of the autumn drop, 16 to 18 month old bulls in this sale.He is a special young bull that has stood out since birth being the heaviest weaner at weaning time by a considerable amount as reflected in his EBVs. He has continued on to be a real stand-out in our opinion. Super thick & soft & weighs like lead.He has a tremendous set of MSA focussed EBVs with top 3% growth for all age groups & carcase weight, & above average eye muscle & marbling EBVs.Good structural scores, sheath & very quiet he is hard to fault. Great pedigree including LochUp, Hallmark, Evident & Highlander. An early maturing bull he should breed some very heavy weaners or young steers. A top end commercial bull. One of the pick bulls.

Top 1% Eye muscle & Retail beef yield. Top 2% Feed efficiency. Top Top 5% 200D wt. Top 10% 400D wt. Top 15% 600D & Carcase wts. An extra good, commercially focussed bull here. He is very well bred by the dam of our \$70,000 top selling bull, Ascot LionHeart. Extremely thick & full of red meat. His photo doesn't do him justice. Extra length & bone, structurally excellent with very strong head, wide muzzle & good temperament. His top end growth, weight for age & high EMA combined with top 2% feed efficiency makes him an ideal commercial bull for cross-breeding or straight angus that will put real weight into his calves & be very profitable. One of the best here.

Top 1% Calving ease. Top 2% Milk. Top 5% Calving ease dtrs & Lighter Birth wt. Top 20% Carcase wt, Scrotal size & Shorter gestation length. Top 20% \$A & \$A-L Indexes. A moderate Paratrooper bull with good length, ideal sheath set up & scrotal. Balanced set of data with very low birth weight & high calving ease, about breed average growth, above average eye muscle & marbling. A very useable bull as his data suggests he should SUIT HEIFERS OR COWS.

A nice type to finish off this run of Autumn born bulls, this bull by Millah Murrah Paratrooper again is long & sleek & is very free moving & alert. Will suit bigger areas as should cover the ground well. Very good structurally with tidy sheath & good scrotal development. Very well balanced carcass data from moderate birth weight to high growth & carcass weight & well above average fats & eye muscle area. Good commercial bull that will improve weight for age & MSA gradings.

Top 5% Carcase wt. Top 10% 200D wt. Scrotal size & Docility. Top 15% 600D wt & Milk. Top 20% Eye muscle, Rib & Rump fats. Top 25% Shorter gestation length. We are very excited to put forward this next run of 6 younger bulls by our new resident sire Dunoon Prime Minister who we purchased for \$140,000 in 2020. He was the highest selling angus bull in Australia that year. We are so pleased with the consistency of his progeny as you can see by these 6 young bulls which are all around 13 months of age. Lot 47 is structurally correct with great temperament, good sheath & very well developed scrotal. With our breeding program we aim for good weight for age & high MSA carcase traits to improve our clients profitability. His data is top class with high growth & carcase weight, high milk, well above average fats & eye muscle area. A good bull to take home & acclimatise until later in the year & then use lightly. Could suit STUD OR TOP END COMMERCIAL. Imagine what this bull would be worth as a 2 year old. Get in now.

Top 2% Scrotal size. Top 10% Rump fat. Top 20% IMF, Rib fat & Docility. Top 25% Eye muscle & Shorter Days to calving. Another powerful, young Prime Minister son here with extra length, good bone & thickness. Structurally very good again with good temperament. Hard to pick between them. Good carcass data with well above average eye muscle area, fats & marbling. This fellow has the added advantage in that his calving ease data indicates he should SUIT HEIFERS OR COWS. A bull you could put out with heifers in a few months. He would certainly be a top end heifer bull, stud or commercial.

Top 1% Rib & Rump fats. Top 4% Calving ease & Lighter Birth wt, Shorter days to calving. Top 15% \$A Index. Top 20% Scrotal size, Shorter gestation length. Top 25% Milk & \$A-L Index. Above breed average Eye muscle. Second last Millah Murrah Paratrooper son in the sale so don't miss him. A moderate framed, long, slick skinned bull with strong sires head & outlook. Good structure & very quiet. Great pedigree out of a Hallmark dam. Good carcass data with high EMA. Very high fats & high IMF. Once again could suit the grass fed market. He has the advantage you could use him over HEIFERS OR COWS. An extra nice type bull here.

Top 5% Calving ease dtrs & Shorter days to calving. Top 10% 200D & 400D wts, \$A & \$A-L Indexes. Top 15% 600D wt & Scrotal size. Top 25% Shorter gestation length. Last angus bull in the sale & a bull I really like. Typical Ascot Mogul son that is so deep & thick with a lot of power. Good structurally, good sheath & temperament with large scrotal. Very good data including short gestation, very high growth, short days to calving & above average fats & good marbling. A great, commercially focussed bull that could suit cross-breeding or straight angus. One of the best here.

Top 1% Scrotal size & Nthn Index. Top 2% IMF, Rump fat, Dom Index, Calving ease, Shorter gestation length & Lighter Birth wt. Top 5% 200D wt & Rib fat. Top 10% Milk, 400D & 600D wts. Top 20% Carcase wt. We are really pleased with the consistency of all our sale bulls, none more than our Charolais. There is very little separating these next 20 rising 2 year old bulls. We have been working on improving the carcase attributes of the charolais breed since we started & these bulls are a result. Lot 74 is no exception. A real power house, wide based bull here by Ascot Nett Profit. He is an extra long, soft bull with real thickness with slick skin type & strong head. Structurally sound with good sheath set up & good temperament. He has carcase data you nearly cannot improve on. High calving ease, lower birth weight, top end growth & carcase weight, high milk & very high fats & marbling EBVs. Great bull for any market you would like to use him in. **SUIT HEIFERS OR COWS EQUALLY.** One of the absolute best bulls in the sale & could suit STUD or top end commercial use. Approaching 1000kg, it's good to see that these moderate, modern, efficient, easy doing Charolais can still weigh heavy.

Top 1% Dom & Nthn Indexes. Top 2% Carcase wt & Calving ease. Top 5% 200D & 400D wts, Milk, Lighter Birth wt & Shorter gestation length. Top 10% Scrotal size. Top 25% IMF. A good bull by Lump Sum, this fellow has a lot to offer. Good weight for age, softness, good length, clean skin & hair type, very good structurally with excellent sheath & docility. He has curve bending carcase data with low birth weight & calving ease, top 5% growth all age groups & carcase weight & well above breed average positive fats & IMF. Hard to improve on this. Would suit any market sector & is very versatile as data suggests he should **SUIT HEIFERS OR COWS EQUALLY.** As a bonus **HOMOZYGOUS POLLED!!**

Top 2% 600D & Carcase wts, Milk. Top 5% Nthn Index. Top 10% 200D & 400D wts & Dom Index. Just when you think these LUMP SUM bulls can't get much better take a look at this fellow. So thick & soft for a powerful bull in a moderate framed package. He has extra bone, depth & one of the most powerful sires heads & outlook you will find. Everyone that inspects the bulls spots him. He has been a standout since about 6 weeks of age & has continued this pattern. Out of a cow that has one of the best calves every year without fail. Structurally very good including good sheath he has top end balanced carcase data so he ticks nearly every box. Top end growth, particularly the important 600 day & carcase weight in top 2%, above average eye muscle & positive fats. He has the very slightest sign of a button scurr. A bull we really like that would make an excellent STUD SIRE or top end commercial bull.

If you combine type & data this bull is one of the best bulls in the sale!! This is what our programme is all about, the **BALANCE** between great phenotype, fertility, temperament & carcase attributes all in a polled package!! This bull has good length, ideal bone, good skin type, strong sires head & data you cannot improve on. Lower birth weight, well above average growth & carcase weight, high scrotal, high milk, very high EMA, fats & IMF. Combined with very good structural scores & **HOMOZYGOUS POLLED** he could suit **STUD** or **TOP END COMMERCIAL**. One of my absolute favourites in the sale. Semen to be collected for in herd use. At nearly 1000kg it again proves that out moderate framed, easy finishing, efficient Charolais can weigh heavy over the scales where it counts.

Top 5% Carcase weight. Top 10% 400D wt & Milk. Top 20% 200D & 600D wts & Scrotal size. Top 25% Rib & Rump fats, Dom & Nthn Indexes. If you haven't got a Lump Sum bull yet another opportunity here, this bull has great weight for age, good softness, strong sires head & very good structural scores & is docile. He has exceptional data as well with top end growth for all age categories & carcase weight, high milk & positive fats which we believe is important for the Charolais breed. In addition to his other good points he is **HOMOZYGOUS POLLED**. A top end bull here again.

Top 5% Milk, Top 10% Rib & Rump Fats, Calving ease, Lighter Birth wt & Shorter gestation length. Top 25% 200D wt, IMF & Indexes. This bull is by a Lump Sum son - Ascot Patriot P808E that we used as a yearling & sold last year. Similar to the previous bulls, Lot 82 is thick, soft & with good bone, length & strong sires polled head. Very good structural scores & temperament. Good balanced EBVs with low birth weight, above average growth & carcass weight & very high positive fat EBVs. Would suit grass fed market well & should sire some very good calves. Excellent all round, safe commercial bull. **HOMOZYGOUS POLLED.**

A nice type, long bull here that is a few months younger than his contemporaries in this group at approx 21 month old. Still has a bit of maturing to do. Structurally near perfect, he is a free moving, alert bull. His carcass data is absolutely near perfect!!! Moderate birth weight, top end early growth & carcass weight combined with unbelievable top 1% & 2% foe Eye muscle area, fats & marbling. Hard to get this. He should breed some top end progeny with all the right carcass attributes for MSA grading. **HOMOZYGOUS POLLED.**

Top 5% 200D & 400D wts, IMF & Rib & Rump fats. Top 10% Milk, 600D & Carcase wts, Dom Index. Top 20% Scrotal size & Nthn Index. This is the first of the 16 to 18 month old bulls with this one being 17 months old & he is a ripper of a bull. We are very pleased & excited with the consistency of these younger Autumn bulls. So much length, thickness, depth of flank, good bone, good structural scores & docility, this bull stands out. He has been admired by everyone that inspects them. He has a fantastic set of MSA focused data like most of our bulls. Moderate birth weight, very high growth for all age categories, high milk, high carcase weight & breed leading fats & IMF. Can't get much better than that. Good skin & hair type. Should suit STUD or top end commercial. Great bull.

Another stand out young bull that is moderate framed with extra thickness & softness & full of red meat. Very slick hair & skin type with good structural scores, sheath & docile. Like lot 93 he is sired by Ascot Kingtide who was top priced bull at one of our autumn sales & purchased by Frank Sorrihan who is a very tough judge. He is breeding very well for us. This lot 94 bull probably has the most perfect set of MSA focused carcase data I have ever seen!! Just look at the graph. Calving ease, moderate birth weight but still with top 1% growth, scrotal, carcase weight & top 1% to 5% EMA, fats & IMF. Really doesn't get any better than that. Combine this with being **HOMOZYGOUS POLLED** he has no holes. SUIT STUD or top end commercial bull. Dont overlook him. Semen to be collected for in herd use.

Top 2% IMF & Shorter gestation length. Top 5% Eye muscle. Lighter Birth wt, Calving ease & Indexes. Top 10% Rump fat & Calving ease dtrs. Top 15% Rib fat. Top 25% 200D wt & Milk. A slick-skinned, extra long, deep, thick bull here by one of our favourite old sires Goldrush. This bull is structurally near perfect with great docility. Once again a super set of MSA targetted data with calving ease, good early growth, & very high eye muscle, fats & marbling. He will breed some high grading calves. Good all round bull that is versatile as data suggests he should SUIT HEIFERS OR COWS.

Top 5% Eye muscle, Rib & Rump fats. Another good type bull by the NZ sire Manhattan out of one of our favourite cows. Once again Manhattan has added extra bone & thickness to this bull. He has very high EMA & positive fat EBVs. Structurally sound he has a bit more zing in him & is alert & would suit larger areas & larger herds. Will cover the ground easily. Very nice type that would suit crossing over bos indicus type cattle. Added bonus he is **HOMOZYGOUS POLLED**. Please note temperament score.

A younger bull here at 15 months he is by the powerhouse sire Rosedale Nagel like the good lot 95 bull. Very similar, he will be a larger frame bull with good length, thickness with extra bone. You can imagine what he will be like as a 2 year old when his coat cleans up. Good structural scores & temperament he has breed leading carcass data once again aimed at MSA grading plus weight for age. Absolute top 1% all growth age groups & carcass weight with very top end eye muscle area, fats & marbling. Many of these bulls have similar carcass data to Angus which is hard to achieve in the Charolais world. This is what we have been aiming for & we are proud of what we see coming through. Complete package as **HOMOZYGOUS POLLED** as well. Dont be pass this young, good bull.

Top 5% IMF. Top 10% Milk. Top 25% Rump fat. This bull had a hard start to life as a twin so has a bit of catching up to do. He is very well bred out of one of our best cows so should still mature into a nice type bull. He is clean skinned with good structural scores & with the advantage of being **HOMOZYGOUS POLLED**. Might be the buy of the sale to take home & grow him out.

Top 1% Milk. Top 10% Calving ease dtrs. Top IMF, Rib & Rump fats. Shorter gestation length & Lighter Birth wt. One of the youngest bulls in the sale at just 15 months this moderate frame red factor bull has some growing still to do. Good thickness & softness in him with lower birth weight, high fats & marbling EBVs. Should be a nice bull when mature.

Top 1% Scrotal size & Shorter gestation length. Top 2% Eye muscle. Top 5% IMF & Dom index. Top 10% Rump fat & Nth Index. Top 20% 200D, 400D & Carcase wts, Calving ease & Lighter Birth wt. Top 25% 600D wt, Milk & Rib fat. Last of the younger autumn born calves, this bull is a really good one so don't miss him. Again by the good Ascot King Tide sire this bull has good skin type, extra thickness & softness as reflected in his data set. Near perfect structural scores & docile he is highly recommended. Near perfect MSA focussed data with calving ease, high growth & carcase weight, scrotal, very high eye muscle, fats & marbling. I'm not sure where you could find a bull with much better carcase attributes than this. He will add some real profitability into his progeny whether weaners or steers. And their gradings should be first class. The complete package as he is also **HOMOZYGOUS POLLED**.

Top 1% 200D, 400D, 600D & Carcase wts, Dom Index. Top 2% Nth Index. Top 5% IMF, Scrotal size, Rib & Rump fats, Shorter gestation length. Top 20% Eye muscle. Back into the rising 2 year old bulls again & he is a ripper. By Rosedale Nagel, the sire of our second top priced bull at \$45K last year & out of one of our well performing, positive fat, high carcase trait cows. This joining has worked well. Very good structurally & very docile with good length, bone & strong polled head. Once again his MSA focussed data is near perfect with top 1% growth all age categories & carcase weight combined with very top end eye muscle, fats & marbling. It is so hard to get these combinations in one bull. Added to this he is **HOMOZYGOUS POLLED** making him the complete package. Could suit STUD or TOP END COMMERCIAL. Great bull.

Top 5% Shorter gestation length. Top 10% Calving ease & Scrotal size. Dtrs. Top 15% Lighter Birth wt. Top 20% 200D wt. Top 25% Calving ease Dtrs & Milk. This red factor bull is the youngest in the rising 2 year olds at 21 months of age. He is out of a 16 year old Moongool foundation cow so should have inbuilt longevity. His sire is the well performed Paringa Kilo Packer who has sired some of our top priced bulls in the past. This bull is as thick as a brick & broad backed in a moderate frame. Good bone, strong head, structurally very sound & very docile. He has above average early growth & carcass weight. He should breed some very thick, heavy weaners. He has small scurrs. Good young bull.

Top 25% Rib fat, Calving ease & Lighter Birth wt. These last 2 bulls are slightly older at 29 months. They missed the sale cut last year but were too good not to hold over to this year. This lot 29 bull is a larger framed, upstanding bull that really stands out. Very slick skinned, thick, long, deep with a powerful sires head with very large scrotal. His carcass data is nearly impossible to improve with moderate birth weight, very high end growth rates all ages & carcass weight. Top 5% eye muscle & well above average fats & marbling. Not sure where you will find many other bulls with this data & this phenotype. Being **HOMOZYGOUS POLLED** into the bargain he makes a STUD SIRE PROSPECT or TOP END COMMERCIAL BULL. A bull we really like.

"More than just a feed company, a partnership for your business"

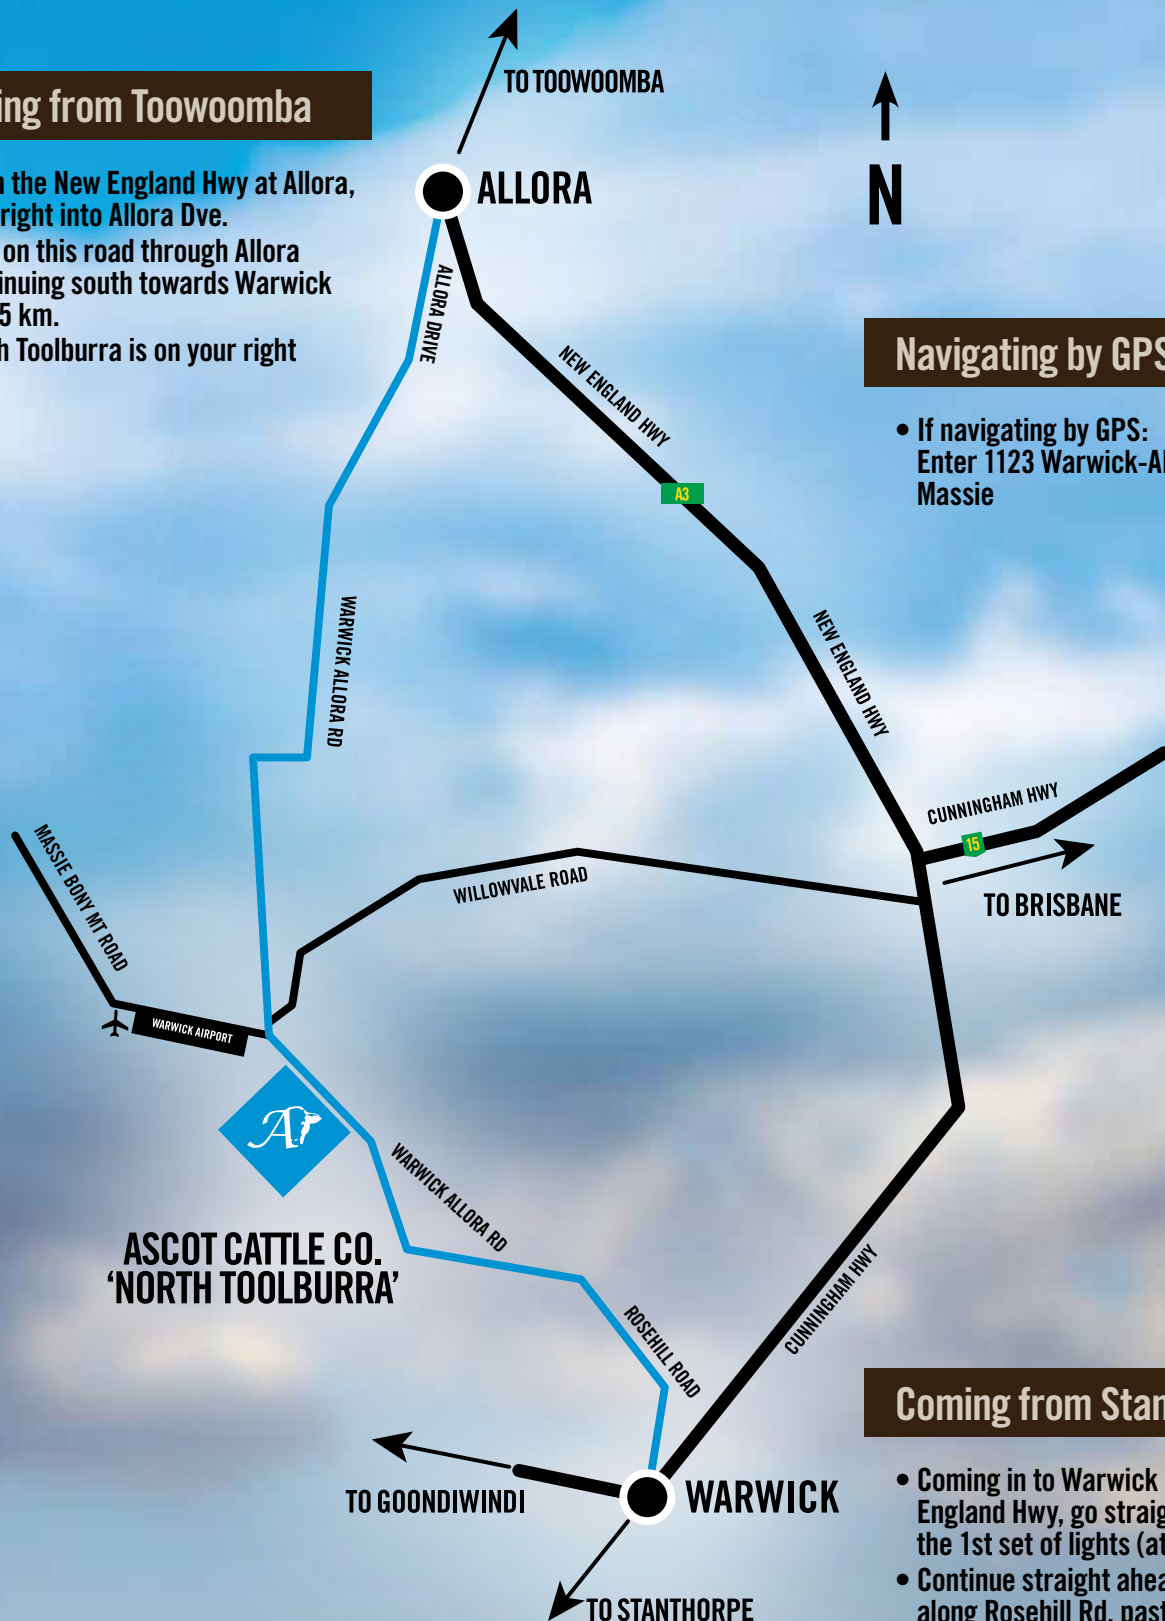

HOW TO GET THERE

ASCOT

Coming from Toowoomba

- From the New England Hwy at Allora, turn right into Allora Dve.
- Stay on this road through Allora continuing south towards Warwick for 15 km.
- North Toolburra is on your right

Navigating by GPS

- If navigating by GPS:
Enter 1123 Warwick-Allora Road,
Massie

Coming from Stanthorpe

- Coming in to Warwick on the New England Hwy, go straight ahead at the 1st set of lights (at Wood St.).
- Continue straight ahead along Rosehill Rd, past the Racecourse, and past John Dee Meatworks.
- Follow this back road to Allora for 9km past the meatworks.
- North Toolburra is on your left.

118 Wentworth Street, Glen Innes NSW

QUEENSLAND LIVESTOCK AGENTS ASSOCIATION LIMITED

STANDARD STUD STOCK - AUCTION TERMS AND CONDITIONS OF SALE

IMPORTANT NOTE: All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

1. The highest bidder shall, subject to Conditions 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the auctioneer's absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
 2. The sale will be conducted on a "Sale" or "No Sale" basis, whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
 3. The details of the purchaser, the purchase price and the lot sold as recorded by the Sale Clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor.
 4. The auctioneer expressly reserves the right, without giving any reason therefore to:-
 - (a) Refuse to acknowledge any bid;
 - (b) Withdraw any lot or lots before or during the sale;
 - (c) Exclude any person from the auction venue should it think fit.
 5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
 6. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these conditions as made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
 7. In the event of any dispute in respect to the sale of any lot:-
 - (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions;
 - (ii) The vendor and the purchaser shall resolve the dispute between themselves;
 - (iii) The auctioneer shall have no liability or responsibility in regard to the dispute; and
 - (iv) No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the purchaser so doing.
 8. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will in all cases be furnished to a purchaser if required. In the case of any dispute the remedy of the purchaser shall be against the vendor only and in no case or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
 9. (a) PAYMENT - Unless prior credit arrangements have been made in writing with the auctioneer the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidders' offer by the vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the purchaser until the full purchase price and cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated and until property shall pass, the purchaser shall hold such lot as Bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to:-
 - (i) Rescind the contract on behalf of the vendor and repossess and resell any lot;
 - (ii) Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill Rate and two percentum. For the purposes of this condition, the expression "The AMBA Bill Rate" is the rate published by the Australian Merchant Banker's Association in good faith as at the date of the sale as its Bill Rate for 180 day Bills of Exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the auctioneer shall determine and advise the purchaser for the interest rate to apply for the purpose of this condition.
 - (b) The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the auctioneer in its own name.
 10. If the purchaser shall neglect or fail to comply with any of the within conditions any lot purchased by him may be immediately resold by Public Auction or Private Contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
 11. Any vendor or purchaser removing the Sale Number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damages should the lot be wrongly delivered.
 12. The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions and shall jointly and severally carry out and perform sale.
 13. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however that this condition shall not in any way negate the vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
 14. The auctioneer may, should it think fit, make arrangements on a purchaser's behalf, for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such service will be at the purchaser's risk and expense.
 15. No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his duly authorised representative.
 16. (a) Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trades Practices Act or any applicable State legislation which cannot be contractually these Terms and Conditions of Sale, any express or implied condition, statement or warranty, statutory or otherwise, is hereby executed. The auctioneer is not liable in respect of any error, misdescription or omission shall entitle the purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
 - (b) Each lot will be sold subject to passing all veterinary tests required by the law of the State or country to which the purchaser intends to transport that particular lot such tests to be undertaken at the purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the purchaser shall be refunded and property in the lot shall revert to remain with the vendor.
 17. In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser, and the auctioneer, while he shall use his best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved not to be a breeder, the purchaser shall nevertheless be obliged to pay the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these Terms and Conditions.
 18. (a) Each lot shall be at the risk of the vendor in respect of any damage or injury, whether by disease, accident or otherwise, for the period that the lot be in the custody of the auctioneer, PROVIDED THAT the auctioneer, its servants, agents and employees shall use all reasonable care to protect and control the lot while it is in the auctioneer's custody AND PROVIDED THAT when a lot has been sold, it shall be at the risk of the purchaser in all respects.
 - (b) If any vendor brings to the premises any lot which is dangerous, or infected with any disease, that vendor shall be liable for all injury, damages, costs, losses or expenses which the auctioneer may sustain, incur or be put to either directly or indirectly as a result of the vendor so doing. The auctioneer reserves the right in its absolute discretion, to exclude from the sale venue or dispose of any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
 19. DELIVERY. Except at the discretion of the auctioneer, no lot shall be delivered to the purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the auctioneer, pursuant to Condition 14 hereof, is first made by the purchaser to the auctioneer. Release of lots may be withheld by the auctioneer until personal cheques are cleared.
 20. In these Conditions:-
 - (a) References to "auctioneer" shall be taken to mean as the contest so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the vendor to conduct the sale of the lot.
 - (b) "Purchaser" shall have the meaning ascribed to it in Condition 1.
 - (c) "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm.
 - (d) "Lot" shall be taken to mean the animal offered for sale and/or sold by the auctioneer on behalf of a vendor.
- IMPORTANT NOTICE The Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy.
- All persons who attend the sale do so entirely at their risk and the Vendor and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
