15 - 18 month old bulls

Semen collected & retained for in- herd use only: Lots - 33,81,88 & 111

FRAME SCORES are approximate

LOT 33: Semen interest. Sells with 100% semen rights. We have had interest expressed in purchasing 100 straws from successful buyer, if agreed

Lot 52: 75% Crushside & 63% Normal Morphology, Vet advice is that while he should be fertile for normal paddock service, it would be prudent to retest the bull in Mid-November. Bull can be left here until then, or can be taken now. Vendor will cover cost of semen retest.

Should he not be fertile a full refund will be given

USED STUD SIRE.
 Used as a back-up sire to our AI in last years heifer joinings as a yearling and this year's autumn heifer joining. He has just come out of cows only 3 weeks ago so is in working condition. (And he is actually in great order considering the number of Heifers covered) Calves on the ground now. As you can see by his photo he is a thumper of a bull with good depth of flank & thickness. Good weight for age with good EBV data to back him up with calving ease, low birth weight, well above average 400 & 600 day growth & carcase weight. Huge EMA in top 5% & positive fats. Indexes in top 10% of the Breed. Structurally good with tight sheath, large scrotal, docility, strong head & good hair type. **Versatile as suits heifers without losing anything on cows.** Video available www.ascotcattle.com.au in early September.
